

Plastic Surgery Post-Operative Care

Tru Home Care understands that post-operative care is very important. In most cases, having home care support can be crucial to a successful surgery and recovery time.

The success of the surgery lies in the hands of the patient as well as the surgeon. The best surgeon on earth will not obtain satisfactory results if the patients do not properly care for themselves after surgery. Tru Home Care is here

Post-Op Services

- 24/7 Supervision for the first 24 hours after surgery.
- Ensure that patient is comfortable and help relieve any pain by repositioning.
