

THE TOP 10 REASONS TO BECOME A CROSSBIKE DEALER:

1.

CROSSBIKE: We are a motorsports brand based near both coasts in Menifee, CA and Mooresville, NC. We support all professional forms of motocross and racing in general.

2.

LOYALTY: We do not sell our ebikes at the big brand retail stores, and we do not sell our bikes online. If we get an order online, we give it directly to our local bike store dealer. When we say we are loyal, we mean it.

3.

Our first ebike is the CROSSBIKE MX1. It is a luxury ebike with Italian motocross design. Top speed up to 33mph and 65 miles of PAS (pedal assist) range.

4.

We won't make you stock our ebikes. Just simply buy 1 at wholesale cost and put it next to your front window. It will have a QR code on it so as customers walk in, they can scan the QR code and see our MX1 brochure on their phone.

5.

When your customers want a CROSSBIKE, we ship it direct to your bike shop from our California warehouse in 2-5 days. We never ship direct to a customer. We only ship to our bike shops.

6.

If you ever decide you don't want the demo unit, we will give you 100% of your money back. Why? Because we always want to be easy to deal with. We also know the CROSSBIKE MX1 sells itself when people see it.

7.

The MX1 competitors (Sur Ron, Super 73, Segway) cost more than double and the components we use are best-in-class.

8.

Early in our company's history, we were a performance lithium-ion battery company. We understand lithium-ion batteries from an engineering standpoint. This is why our ebike batteries are safer, more efficient, work well in cold weather, and outperform many of our more expensive competitors. Our batteries are even UN 38.3 Compliant, which means they can even travel by air.

9.

Warranty: 1 year bumper-to-bumper. 3 years on our motor. Replacement parts arrive in 2 to 5 days.

10.

We bring style and performance to the ebike industry, without sacrificing value. At CROSSBIKE we say: "California Engineering Meets Italian Design"
