

Cantilever Sliding Gate Fully Automatic

The Automatic Cantilever Gate is a pioneering concept using a simple yet reliable design, it uses an external friction drive mechanism made from aluminium.

CE Approved BS/EN 12453

Main Beam

250mm x 225mm extruded Aluminium Beam

Infill

- 30mm diameter x 6mm Wall thickness

Power Requirements:

230v, Single Phase, 50Hz, 10 Amps

Drive Motor

0.75KW's - 1.1KW's, 3 Phase

Speed

4 Seconds per metre (Variable) at 100% Duty cycle

Access Control

Connection into any voltage free N.O contact

Accessories

Flashing light, Manual override, E-Stop, Keyswitch

Compliance to The Machinery Directive
Fully Safety Installed
Dual Height Photocells
Gate Safe
