**Perspex & Glass**

**Flatop**

**Sloping**

**Laser cut**

**Numbers**

**Stainless**

**All our gate designs can be made into a swing or sliding aluminium system. We offer both manual or automated options**

# Aluminium Characteristics

Join the trend with our aluminium gates, virtually maintenance free, offering a much longer life than traditional timber gates. No requirement to paint your gate again! Although aluminium can be more expensive in the short term than wooden gates, the cost of maintenance, and periodic replacement of timber gates mean that aluminium is the perfect choice for long term sustainability and appearance.

Benefits of choosing aluminium include

Corrosion Resistant

Scratch Resistant

Stain Resistant

90% Recyclable

UV Stable

Frost Resistant

Periodically washing the gates with water will prolong the life and prevent any build-up of natural debris.

Should the gate become scratched, you can have peace of mind that it will not rust due to the amazing properties of aluminium. We can provide touch up paint if required or simply purchase our gate care package when you order the gate.

38 x 16mm Plank

65 x 16mm Plank

100 x 16mm Plank

150 x 16mm Plank
