Silex PTE, motorized lift and table kit

Silex PTE, motorized lift & table kit

Discover Silex PTE Quattro in a perfectly designed environment that leverages the video collaboration experience, making it the most natural and practical UC&C system in the market today.

The new collaboration kit is composed of a perfectly dimensioned squared table and an embedded motorized lift tuned around your Silex PTE Quattro. When installed together, your collaboration space will be compact, futuristic and elegant while offering numerous benefits and optimizing the PTE Quattro existing unique features.

Features & Benefits

Table shape and dimensions tuned for an optimal experience

The table has been dimensioned taking into consideration body anatomy standards, viewing distance standards and the PTE Quattro dimensions. The collaboration experience is enhanced without compromising on comfort:

- All participants are seated at a same arm distance from any side of the system (between 65cm (25") to 74cm (29")). Therefore, they can easily touch the screens to annotate or control the system without leaving their seats

Same Viewing Experience

- Participants have the best viewing experience from any side of the system. They are seated in front of 17.5" screens seen from a 70cm (28") distance approximatively. This is equivalent to looking at an 84" screen from a 3.36m (11 feet) distance
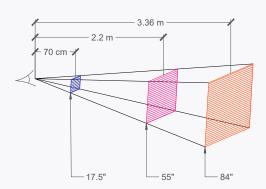

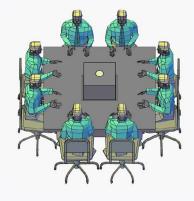

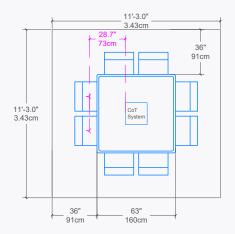

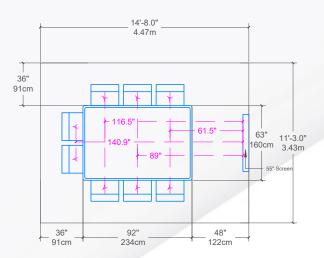

- Local participants can see each other. The Silex PTE system on this standard table height does not hide local participants form each other

- The Silex collaboration table kit requires between 30% and 60% less room space than a traditional wall-mounted screen setup. Hence, the required space is reduced and optimized resulting in significant real estate cost reduction

3

Perfectly framed participants

All 8 participants sitting around the system are perfectly framed by one of the cameras, therefore:

• They all look the same size because they are sitting around the designed squared table at the same distance from the cameras.

• They have a perfect eye contact during video calls since the camera is located right in front of them

All-in-one Centre of Table concept

Silex PTE systems are unique center of table video collaboration devices that have no equivalent in the market today. They offer unique advantages that enhance the overall collaboration experience and comfort like no one else:

• Great meeting intimacy and comfort: up to 8 people are naturally gathered around the table and are seeing each other. No more neck twisting to look at a wall mounted screen

• Efficient radial sound distribution from the central embedded Sennheiser speakerphone

• Great symmetrical audio pickup, since all participants are sitting at an equal distance from the central speakerphone

• Intuitive graphical user interface accessible from any of the touch screens: no need to leave one's seat nor to learn how to use a remote control

• Flexible white-boarding experience for all 8 participants from any of the 4 touch screens. Anyone can annotate from his/her side, while still seated and perfectly framed by the camera, and without blocking the screen view from other participants in the room

Clean meeting space

The Silex PTE collaboration table kit will transform your meeting space into a futuristic and elegant collaboration area where all technology is hidden:

• Your setup is perfectly clean without visible wires, AV cables and cameras in the room

• Silex PTE Quattro is placed on a specially designed motorized lift, in the center of the table. It can be retracted into the table with a push of a button, leaving the table empty for other purposes

Click Here to see the lift in action

Silex PTE unique features

- The most flexible content sharing experience: the system supports AirPlay, Miracast and Intel WiDi wireless screen mirroring protocols allowing any participant to start sharing wirelessly from virtually any device, without the need to install any client on the device

- A unique agnostic device: the system offers unparalleled native compatibility with all soft/cloud/web based VC clients that run on Win10. Therefore, any far end system can be reached no matter what VC platform is used

Table specifications:

Shape: Square with rounded edges
Dimensions: W:160cm x 160cm (63") - H: 76cm (29")
Assembly: Easy self assembly
Material: strong metallic chassis, high quality wood top and base cover
Color: White or black
Embedded motorized lift in the center

Motorized lift:
Squared shape base for PTE Quattro
The motorized lift can be ordered as a separate item or as a bundle with the table.

Chairs:

Silex collaboration kit is supplied without chairs
