MY STORY (VEENA)

Let our voices be heard ! Sharing my story

As my father had two daughters , lot of people in India , felt sorry for him. “ Oh you have no sons, who will look after you in your old age, what will you do ? “. But my father an engineer ,was a visionary thinker , who refused to believe this - treated us daughters as equal to any son . We were brought up to be strong, independent and confident . Under very tough circumstances, both my parents made lot of sacrifices and educated us well .

I worked hard and got dual MBA degrees. With this background , I worked with some of the top companies internationally. Came to the US and gained strong experience across diverse industries. So many women, minorities gave me support and guidance to help me grow.

I then founded Domain Experts Corporation (DEC) . Never forgetting these circumstances, while we planned for good business growth, we have decided to give back to women and underserved population. DEC has several initiatives to support and enable women .
