FILTER OUT THE REST AND STAY WITH THE BEST
The tag line says it all...

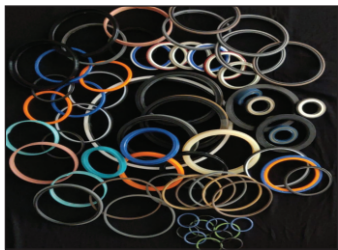

Sakura Filters offer the widest range of quality products available globally and supported by excellent service. These filters are made to the exact standard to reduce frictional wear by eliminating the particulates released from friction parts and combustion. This enhances the efficiency and life expectancy of the components.

MAGIC SEAL Brand seal kits are the preferred after-market alternative to the original equipment manufacturer.

As a premier provider of sealing systems for heavy earthmoving equipment, MAGIC SEAL Brand seal kits support Excavator parts distribution companies and heavy equipment operators & resellers around the country.

MAGIC SEAL Brand seal kits are designed and manufactured for the critical and demanding hydraulic cylinder, transmission, pumps and motor applications found in heavy equipment.

All kinds of cylinder seal kits, oring kits, centre joint kits, track adjuster kits, pilot lever kits, pump oring kits, swing motor seal kits, track motor seal kits, control valves seal kits, etc are available for all makes of excavators.
