

TASER ECD Certification Course

This 6 hour Certification Course is taught by TASER International Instructor Peter A. Davila

TASER International's products protect life, providing advanced Electronic Control Devices (ECDs) for use in the law enforcement, medical, military, correctional, professional security, and personal protection markets. TASER devices use proprietary technology to incapacitate dangerous, combative, or high-risk subjects who pose a risk to law enforcement/correctional officers, innocent citizens, or themselves in a manner that is generally recognized as a safer alternative to other uses of force. TASER technology protects life, and the use of TASER devices dramatically reduces injury rates for law enforcement officers and suspects.

The TASER® C2™ Standard Issue Kit was created with the Professional Security officer in mind. This kit includes the TASER C2, a holster, and three cartridges. The TASER C2 is an Electronic Control Device (ECD) that uses similar technology as that of the TASER® X26™ law enforcement model and can be used for self-defense by Professional Security officers who need an added level of protection.

Upon Completion of this course the security officer will have full knowledge and Certification of the **TASER C2 or X26C** along with all legal aspects pertaining to the use of this sophisticated Electronic Control Device.

COST

*OUR TASER TRAINING PACKAGES STARTS AT **95.00** for the TASER Pulse & X26 Certification. Taser Pulse & X26 Available at discounted prices
