NEW AND UNIQUE INFORMATION

This book covers nearly 40 years of research and contains original concepts not found anywhere else.

The printed version is not yet published and consists of 2 volumes with nearly 500 A4 size pages total. There is a free PDF download available of the numerous tables and diagrams - many of which are in colour.

It compares and harmonises traditional philosophic and esoteric teachings with some of the latest discoveries in Psychology and Science - the most important being the discovery of the Transcendent Planets Uranus, Neptune, and Pluto, the now accepted story of Evolution beginning with The Big Bang, the modern scientific use of Number Zero - which was not recognised in earlier history, and C.G.Jung's concept of Individuation. It also considers insights given by the trance medium Edgar Cayce - who also gave verifiable information about people he never met. This method reconciles differences when authorities on a subject disagree.

The main principle of The Cycle of Growth is that all cyclic processes, no matter how many stages we split them into, are manifestations of the same Whole. In each cycle the positive and negative forces balance one another to return to the original Zero State. When we compare the Cycle of Growth with seeming different areas of study there is remarkable correspondence.

ASTROLOGY AND PSYCHOLOGY

- Ancient philosophy did not include knowledge of the psychological concepts that are available to everyone today, although it was present in symbolic form. We also recognise that, as with the Hunter Gatherer, the mental psychology was different to that of today because the Jungian Thinking Function has developed from the general public access to Reading, Writing, and Mathematics - which are also relatively new subjects.
- It is becoming recognised that our experiences in the womb affect our later life. When we compare the Astrological Logarithmic Timescale of a human lifetime from Conception to Death with The "Development of Personality" stages of Freud, Erikson, and Piaget there is exact correspondence.
- The Logarithmic Timescale also adds a "Transcendent Octave" which gives rise to evolutionary development.
- The planet Uranus clearly relates to the Jungian psychological concept of The Individuation Process.
- Now in The Age of Aquarius, we can use recent historical discoveries to understand the other Zodiac Ages.

THE TAROT

- The 22 symbols of the Major Arcana match the 12 Cycle of Growth Stages in sequence.

NUMEROLOGY

- Traditional philosophical systems and Numerology do not include Number Zero because it is a relatively new discovery - only becoming a number in its own right in the Computer Age.
- The sequence of Numbers corresponds with the process of Evolution - and therefore The Cycle of Growth - from The Big Bang onwards, as demonstrated by the development of all Chemical Elements from basic Hydrogen.

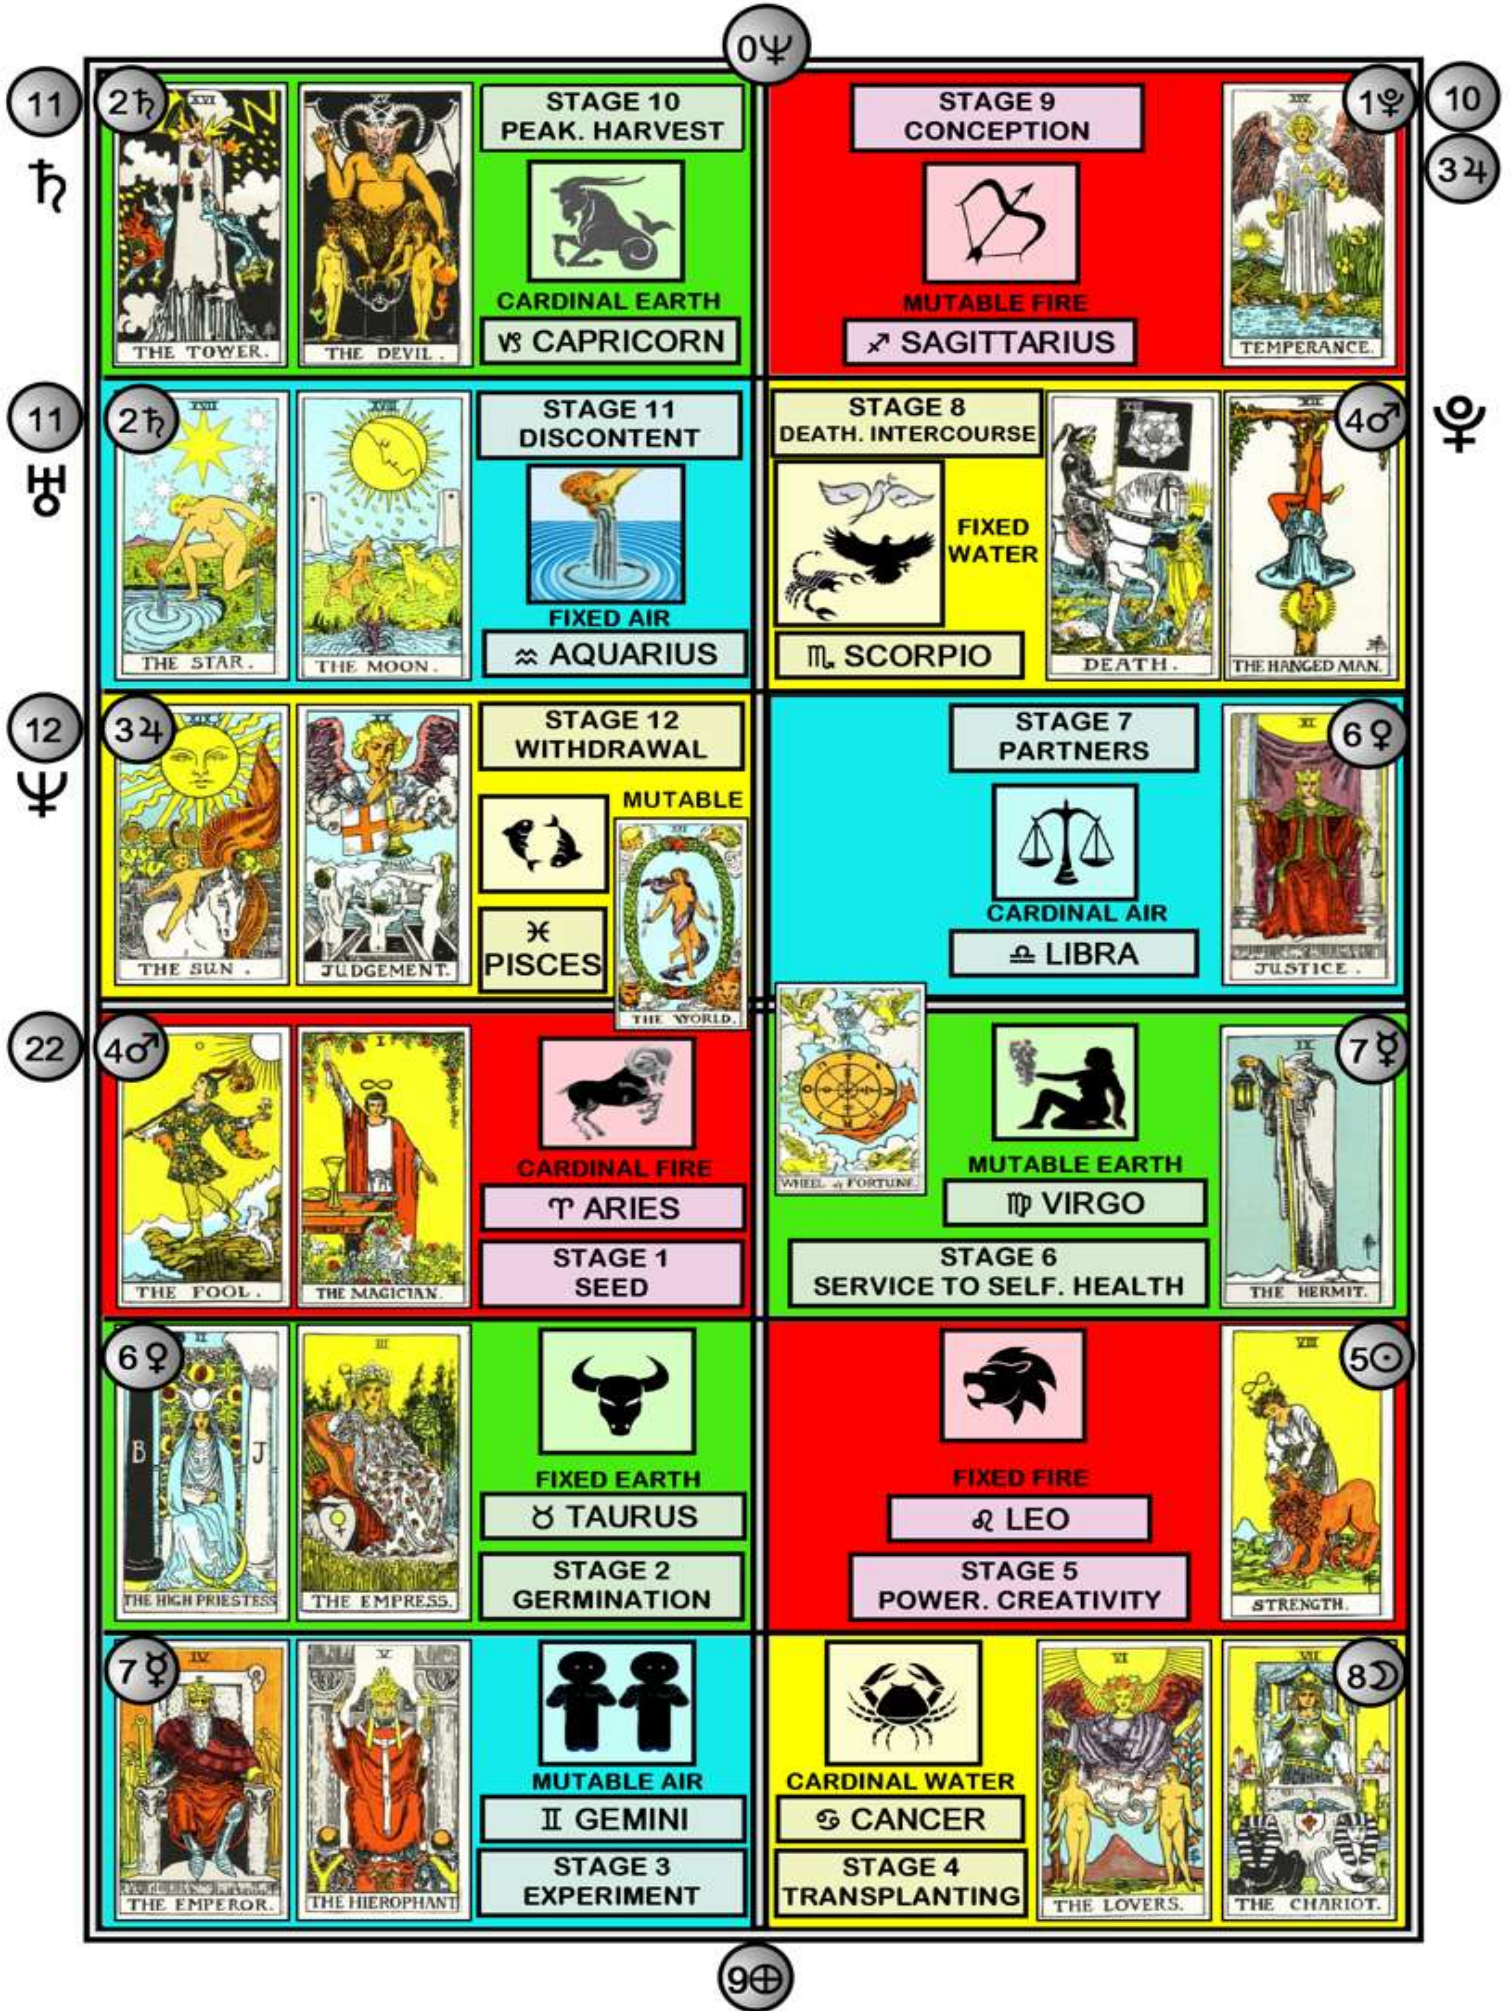

THE KABBALAH TREE OF LIFE

- This symbolic system gets closer to the archetypal universal principles than the others and therefore associates with all other areas of study to the enrichment of them all.
- The Astrological symbol of Neptune is a basic depiction of the 3 Pillars of The Tree of Life.
- With the discovery of Number Zero, we are now able to associate Numbers Zero to 9 with the 10 Sephiroth of The Tree - which was not previously possible.
- With the discovery of the Transcendent Planets we are able to add them to The Tree of Life where there were traditionally no planetary associations.
- "The Lightning Flash" of Kabbalist involution and related Astrological planets exactly matches those of the sequence of stages in The Cycle of Growth. We can now add a transcendent function to The Tree which was not apparent before.

THE BIBLE

- The Life of Jesus relates to our life from Conception to Birth, and Transcendence. The First 3 chapters of Genesis describe the 3 Octaves of The Astrological Logarithmic Timescale.
- The Tree of Life mentioned in Genesis and Revelation (and The Kabbalah) refers to the human Chakra System of energy centres in the human body, and the related hormone-producing endocrine glands.

BBC NEWS STORY : MOON PHASES AFFECT CRIME

Crackdown on lunar-fuelled crime

Extra police officers are to patrol the streets of Brighton on nights when there is a full moon.

It follows research by the Sussex force which concluded there was a rise in violent incidents when the moon was full - and also on paydays. Inspector Andy Parr said he compared crime statistics for Brighton and Hove with lunar graphs to discover the trend. The legend that people can become violent, or even turn into wolves, can be traced back to ancient times.

" Research carried out by us has shown a correlation "

Sussex Police spokeswoman. But nobody has been able to explain a link between lunar cycles and human behaviour. A spokeswoman for Sussex Police said: "Research carried out by us has shown a correlation between violent incidents and full moons." More officers will be out on Brighton's streets during full moons over the summer months, she added.

"Strange behaviour"

Mr Parr has said he would be interested in contacting universities who may be interested in examining the link further. He told the BBC: "From my experience, over 19 years of being a police officer, undoubtedly on full moons, we do seem to get people with, sort of, stranger behaviour - more fractious, argumentative. "And I think that's something that's been borne out by police officers up and down the country for years." Past research into the phenomenon includes a study by Professor Michal Zimecki, of the Polish Academy of Sciences, who argued that a full moon could affect criminal activity and health. In 1998, a three-month psychological study of 1,200 inmates at Armley jail in Leeds discovered a rise in violent incidents during the days either side of a full moon. Meanwhile in 1994, Jack Nicholson starred in a film called Wolf, in which a publisher becomes infected by a creature and turns into a wolf at full moon.

ASTROLOGY: PLANETS

THE SOLAR SYSTEM

THE SOLAR SYSTEM

* The picture shows the relative positions of the planetary orbits.
 * The planet sizes are not to scale. Planets Mercury to Mars are much smaller.
 * Except for Pluto, they do not deviate far from the horizontal plane - so an Astrological chart is a good representation or "map".
 * As seen here, Sun, Mercury, and Venus form a Conjunction aspect, the other planets form another Conjunction. The 2 Conjunctions are in Opposition.

PLANET RULERS OF ZODIAC SIGNS AND HOUSES

NEPTUNE

IMAGE OF THE KABBALAH TREE OF LIFE

- * The glyph for Neptune represents the Trident of the Roman god Neptune - "Earth Shaker" and Ruler of the Collective Sea.

- * By adding the Sephiroth we can see that it is a depiction of the Kabbalah Tree of Life.

PLUTO

P

- * The glyph of Pluto is a symbol of involution with the Circle of Spirit being received by the Semi-circle of Soul and transmuted into the practical reality of the Cross of Matter.
- * It is also a symbol of evolution where matter is transmuted to Spirit. $E=Mc^2$

URANUS

* The glyph of Uranus (Sky) is similar to that of Mars with the Cross of Matter above the Circle of Spirit, but has the addition of two receptors.

* Personal drive is modified by information from the super conscious - like the television aerial receiving sound and pictures.

Glyph of Uranus compared with the first television aerial

THE OUTER PLANETS

SATURN

- * The components of the glyph of Saturn are the same as those of Jupiter. Here the Cross of Matter rises above the Semi-Circle of Soul.
- * The abstract concepts of expansive Jupiter are forced into practical use - demanding physical evidence.
- * The principle of Saturn is Consolidation.

JUPITER

- * The glyph of Jupiter consists of the Semi-Circle of Soul combined with the Cross of Matter.
- * It shows how the higher mind can create abstract concepts beyond the limitations of physical constraint. Or *Illusion*.
- * Its principle is Expansion.

MARS

- * Here are two representations of Mars with the same meaning. A reversal of the passive Desire symbol of Venus.
- * The first is an Orb - Material status is uppermost.
- * The second is an indicator of Desire transformed into positive action to achieve its object.

ASTROLOGY : PLANETS

THE PERSONAL PLANETS

THE SUN

- * The glyph of The Sun consists of two representations of the Circle of Spirit - symbol of Wholeness and Completion.
- * The outer circle is the point at the centre made manifest.
- * As Above, So Below.
As Below, So above.

THE MOON

- *The glyph of The Moon represents Soul as a reflection.
- *She is a Circle like The Sun, but reflects its light in phases depending on how the shadow of The Earth falls on her surface.
- *We can therefore see The Sun, and learn its lessons, without the risk of being blinded by its light.

VENUS

- * The glyph of Venus consists of the Circle of Spirit above the Cross of Matter.
- * She is Beauty of form and passive Peace in Action.
- * She is Desire for whatever represents Wholeness and Completion to the individual at all levels, low to high. Inner Magnetism. The 'Missing Part'.

MERCURY

- * The glyph of Mercury is made up of the Circle of Spirit mediating between the receptive Semi Circle of Soul and the Cross of Matter.
- * It is The Messenger that receives abstract Ideas and converts them into recognisable form - and converts Form into Ideas - as we are doing here.

THE EARTH

- * The glyph of Earth shows the Cross of Matter enclosed in the Circle of Spirit.
- * It shows that, on Earth, there is no separation between Matter and Spirit.
- * By observing the Seen we can also observe the Unseen.
- * As Above, So Below.
As Below, So Above.

Of the Preparation of Sol.

Perfect Bodies need not *Preparation*, in relation to their further *Perfection*, being perfect; but that they may be more subtiliated, and attenuated, we adhibit this *Preparation* to them:

R *Sol* or *Gold* beaten into thin *Plates*, and with them and *Common Salt* very well prepared, make Lay upon Lay in a *Vessel* of *Calcination*, which set into a *Furnace* and Calcine well for three days, until the whole be subtilly Calcined; then take it out, grind it well, wash it with *Vinegar*, and dry it in the *Sun*, afterward grind it well with half its weight of cleansed *Salarmoniac*; then set it to be dissolved, until the whole (by the benefit of *Common Salt* and *Armoniac*) be dissolved into a most clear *Water*. This is the precious *Ferment* for the *Red Elixir*, and the true *Body* made *Spiritual*.

Mining

2. INTERIORA (Interior. Content)
Crushing the ore

3. TERRA (Earth. Ash)
Calcination equipment

4. RECTIFICANDO
The ore powder mixed with Mercury. The waste is a brown colour. The gold is beginning to amalgamate with the mercury.

5. INVENIES (Find)
A bead of amalgam is transferred to the storage vessel.

WORK IN PROGRESS
Waste is washed away. The mixture is hand rubbed to aid the chemical reaction. More amalgam is stored.

6. OCCULTUM (Hidden)
Filtration.
The amalgam is squeezed in a cloth to remove excess mercury.

FILTRATION CONTINUES
The cloth is twisted tighter.

PREPARATION FOR MELTING
The cloth containing the amalgam is placed in a crucible.

SUBLIMATION
Mercury is evaporated away or Borax is melted.

7. LAPIDEM (Stone)
Heating is continued to melt the gold.

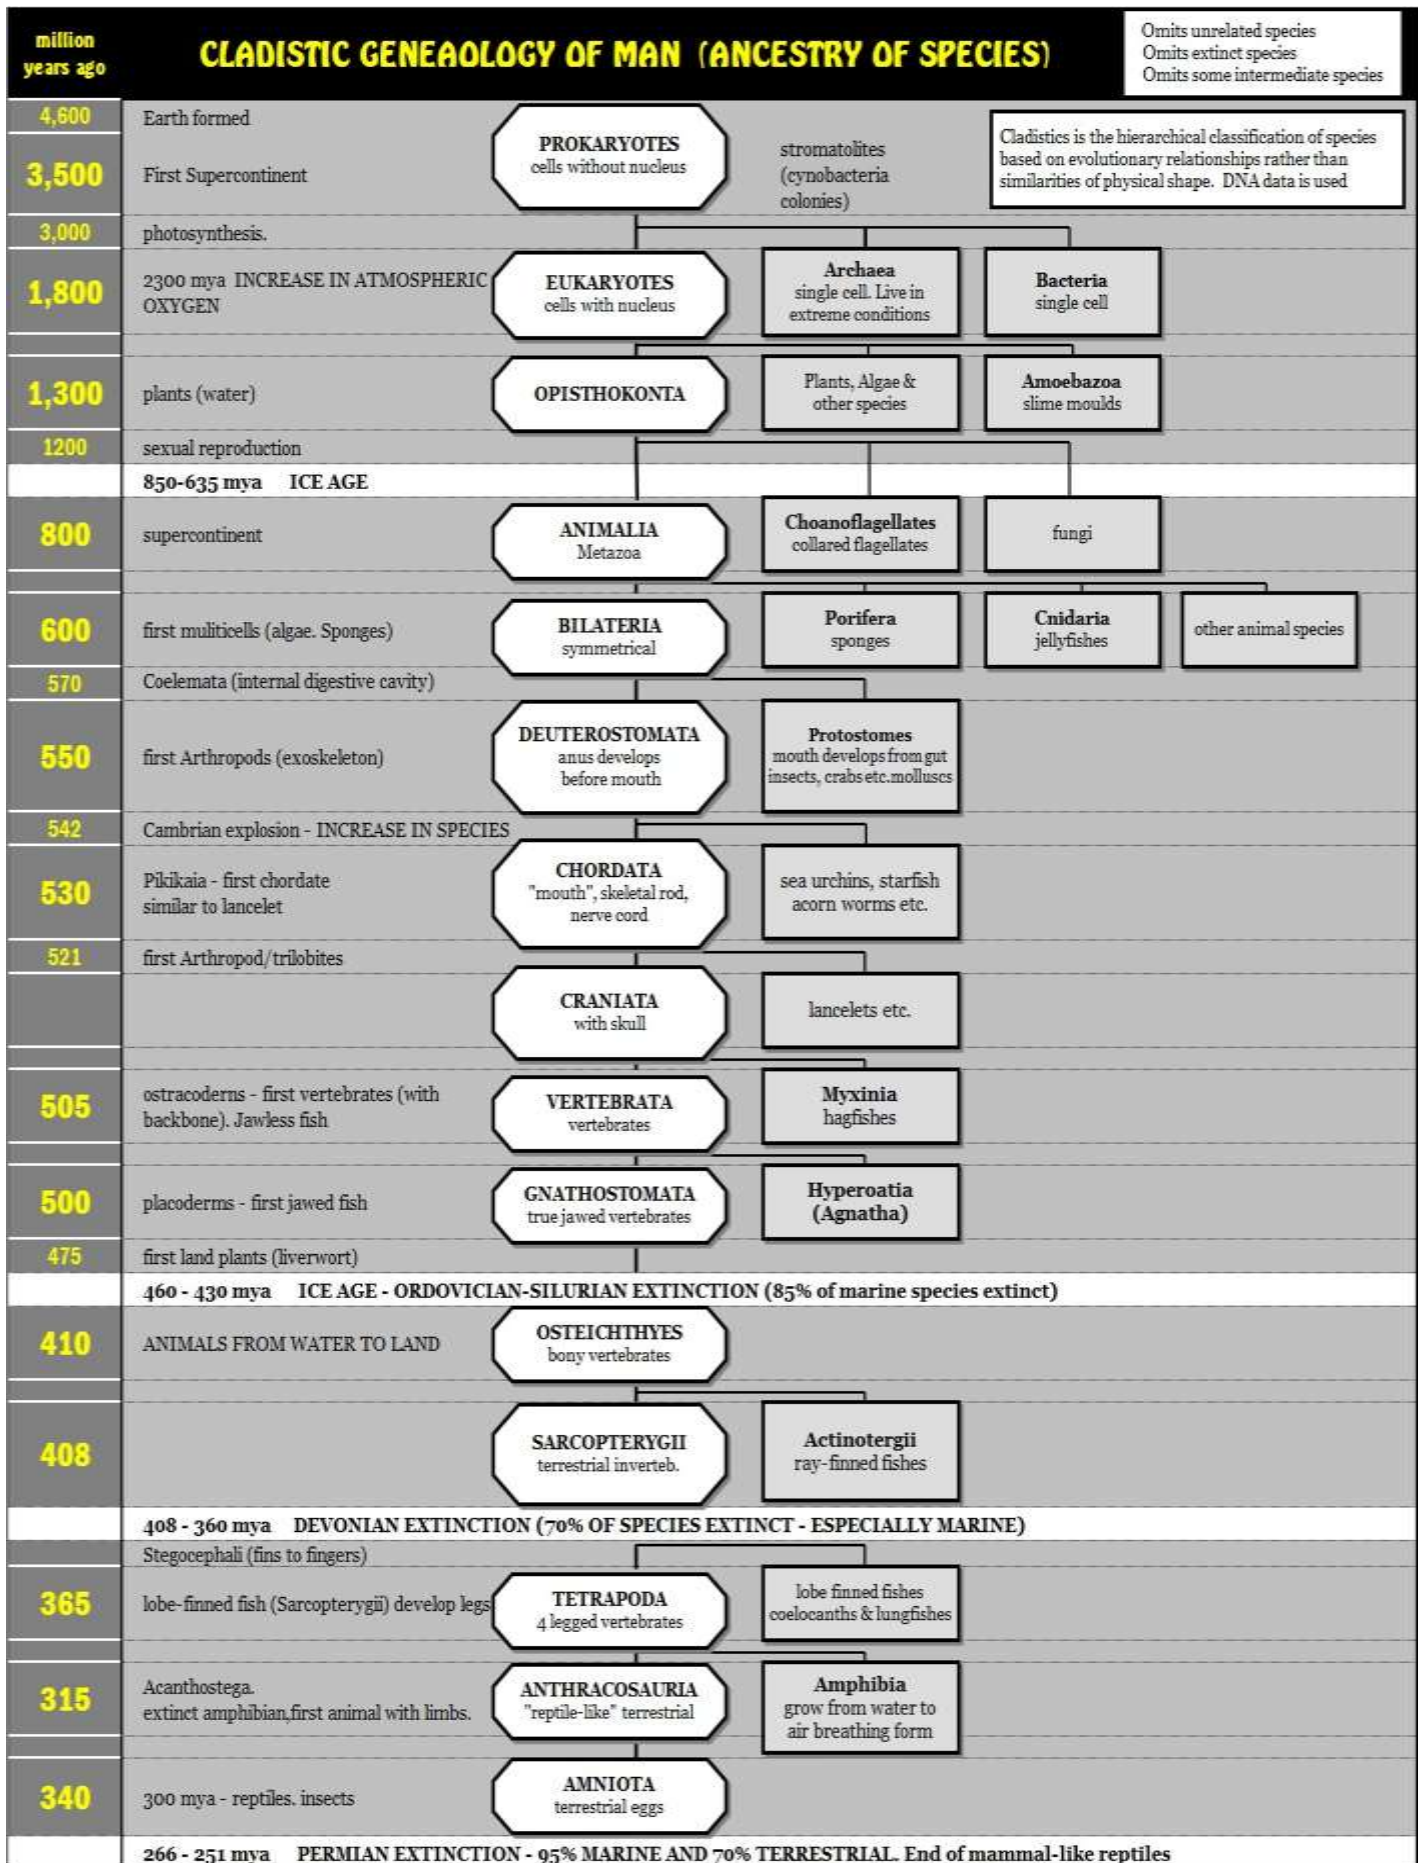

A STONE
The final product is a bead of gold.

SOLOMON'S TEMPLE

SOLOMON'S TEMPLE

THE PHYSICAL STRUCTURE

In this floor plan I have removed a considerable amount of detail (about which there is disagreement) to focus on the important basics.

The information comes from the Biblical chapters 2 Chronicles and 2 Kings.

The first thing we note is that the structure is relatively small in relation to its purpose. Overall 60 cubits by 20 cubits (90 feet by 30 feet) and 20 cubits high. The main expenditure was on the internal fittings which were brass with gold inlays and fittings, as well as cedar wood. Its cost nearly bankrupted the nation.

Apart from worship, the main purpose of the temple was to house The Ark of The Covenant - which was, basically, a container for the 2 stone tablets which were inscribed with The Ten Commandments. The Ark was contained in a separate room called "The Holy of Holies" to which only priests were allowed access once each year. The entrance was covered by a "veil" to hide its interior from the general public. The suggestion is that secret rituals were performed there.

The Holy of Holies room was a 20 cubit cube shape.

There are 2 sets of steps to symbolise 2 levels of consciousness above the normal one.

This image is a simplified version of The Tree of Life. The Pillars are positioned to match The Tree of Life.
