

GUNS ARE IN MORE THAN ONE THIRD OF ALL U.S.
HOUSEHOLDS, SO THEY'RE A VERY REAL DANGER
TO CHILDREN, WHETHER YOU OWN ONE OR NOT.
THAT'S WHY IT'S IMPORTANT TO TALK TO KIDS
ABOUT THE POTENTIAL DANGERS OF GUNS, AND
WHAT TO DO IF THEY FIND ONE.
IF YOU DO KEEP A GUN IN THE HOUSE, IT'S VITAL
TO KEEP IT OUT OF SIGHT AND OUT OF REACH OF
KIDS. THE GUN SHOULD BE KEPT LOCKED AND
UNLOADED, AND THE AMMUNITION SHOULD BE

GUNS AND PRETEND PLAY

Allowing kids to play with toy guns is a personal decision, as is how to respond to a child's pretend shooting action during the course of play. Remember that even if you don't allow your kids to have a toy gun, their friends may have them. So explain to your kids that real guns — unlike toy guns or those shown on TV, in movies, or in video games — can seriously injure or even kill a person.

TALKING TO KIDS ABOUT GUN SAFETY

Teach kids to follow these rules if they come into contact with a gun:

Stop what they're doing Do not touch the gun Leave the area where the gun is Tell an adult right away

It's Particularly important for kids to leave the area to avoid being harmed by someone who doesn't know not to touch the gun. A child as young as 3 has the finger strength to pull a trigger. It's also important for kids to tell an adult about a gun that's been found.

IF YOU HAVE A GUN IN YOUR HOME

Many kids are raised with guns in the home, particularly if hunting is a part of family recreation. If you keep a gun in the home, it's important to teach your kids to act in a safe and responsible way around it.

To ensure the safest environment for your family:

Take the ammunition out of the gun.

Lock the gun and keep it out of reach of kids. Hiding the gun is not enough.

Lock the ammunition and store it apart from the gun.

Store the keys for the gun and the ammunition in a different area from where you store household keys. Keep the keys out of reach of children.

Lock up gun-cleaning supplies, which are often poisonous.

When handling or cleaning a gun, adults should never leave the gun unattended.

If you own a gun or have found one in your home and want to dispose of it, call your local police station. Do not dial 911 or an emergency line. Laws differ between states, but generally, the firearm will be checked to ensure it was not part of a criminal investigation and then it will be destroyed.

Community "Buy-back" Or "amnesty" days are another disposal option. These programs allow people to bring unwanted guns to a designated place where they will be made unusable. To find out if your community hosts such a program, contact your local police department — but don't wait until such a program becomes available to dispose of an unwanted firearm.

GUN SAFETY OUTSIDE YOUR HOME

Gun Safety does not end when your child leaves your home. Kids can still come in contact with a gun at a neighbor's house, when playing with friends, or under other circumstances away from home.

Make sure you talk to your kids about gun safety outside your home. They might even know which friends have guns in the home and where they are stored — ask them.

Also discuss gun safety with the parents of friends if your child spends time in their homes. It may feel like an awkward conversation, but the person you ask will likely understand that you only have your child's safety in mind. It is OK to speak up and ask! If there is a gun in the friend's home, you need to decide if it poses a safety risk to your child. If you're uncomfortable having your child play there, consider offering to host at your house instead.

A WORD ABOUT BB AND NON-POWDER GUNS

Non-powder guns, such as ball-bearing (BB) guns, pellet guns, and paint-ball guns, are not regulated by the government but can cause serious injury and death.

The U.S. Consumer Product Safety Commission (CPSC) recommends that kids under age 16 not use high-velocity BB guns or pellet guns. And these guns should only be used under the supervision of an adult. Kids who have a BB gun, or are likely to come into contact with one, must know to never point it at anyone, including themselves.

Paint-ball guns are known to cause traumatic eye injuries, so kids need to wear protective eye gear. Kids should not put caps for toy guns in their pockets because these can ignite due to friction and cause burns and loud noises that can damage hearing.
