About AGC Education

In 2017, the training and education arm of American Global Consulting started through the partnership launched between AGC and Swiss School of Management to offer its MBA program in the GCC Region.

Several training programs in partnership with Tamkeen were also conducted through Muhlenberg College, Institute of Public Administration, United Franchise Group, The Humpty Dumpty Institute, Titus Center for Franchising, American Global Institute among others.

In 2021, AGC continued to soar and had increased its affiliations to educational institutions other than the addition of BBA and DBA programs through SSM. AGC is also affiliated with Learners University College, Sunrise University, and OTHM UK Qualifications making-up the name AGC Education that is known today.

About Swiss School of Management

The Swiss School of Management (SSM) is an accredited private institute of higher education founded in the last century in Switzerland. While the head office is still in Switzerland, in 2002 the School moved operations to the eternal city of Rome, Italy where it continues to successfully operate today. With the move to Italy, SSM students benefitted from EU policy which grants students the ability to travel and work without visa in 27 member countries of the European Union. Still today, Switzerland is not part of the EU. To facilitate recruitment and allow foreign students to be closely followed by tutors and SSM Staff members, the school has opened more learning centers: Dubai (UAE), Bahrain (GCC), Cairo (Egypt), and Brescia (Italy).

The beauty of being in different countries is having a closer relationship with our international students. Since most of our programs can be offered through online learning, students appreciate the ability to be followed by local tutors and staff members. Our learning centers are also official examination centers where candidates can defend their final theses, dissertations, and projects. An international network aims to give students a chance to travel the world, get exposed to new cultures & customs, and continue with their studies under the same academic roof.
