

About Sara Haley

Sara Haley is a mother, a freelance provider, and a published eBook author.

In her early years, her love of writing inspired her to write freelance articles for Suite101 and Planned Parenthood when she was only 15 years old. Her success led her to various writing positions, both online and offline, including an internship with the local newspaper.

Diverted from her writing career after she graduated high school, she pursued an English degree in college and stepped foot into the world of graphic design and desktop publishing. The combination of these skills, in addition to her self-taught abilities to create and manage websites, led her to freelancing her skill again online—but this time, with much more fervor.

Her ambition to work in various skill sets, including data entry and audio transcription, led her to the endless opportunities of oDesk. With a profile

write-up and a picture, Sara Haley quickly snagged her first position on oDesk and has never looked back.

Of course, over time, she has spent some time focusing on her beloved writing career, and has become the writer and editor for OmahaMoms.com and the national site HappyApping.com soon after. Along with maintaining these sites, she also posts her work elsewhere on the web. Along with oDesk, her professional career took off from her home while wrangling children.

At such a young age, Sara Haley has made a name for herself, both locally and nationally, and has written a series of eBooks delving into the freelancing world of oDesk. Her books have been recognized by oDesk themselves, and led Sara to be a guest blogger for oDesk's community blog.

Sara Haley can be contacted through oDesk or through her website at sarahaley.com. She can also be emailed at sarahaley@yahoo.com with any questions, concerns, or information on her services.

Web Design

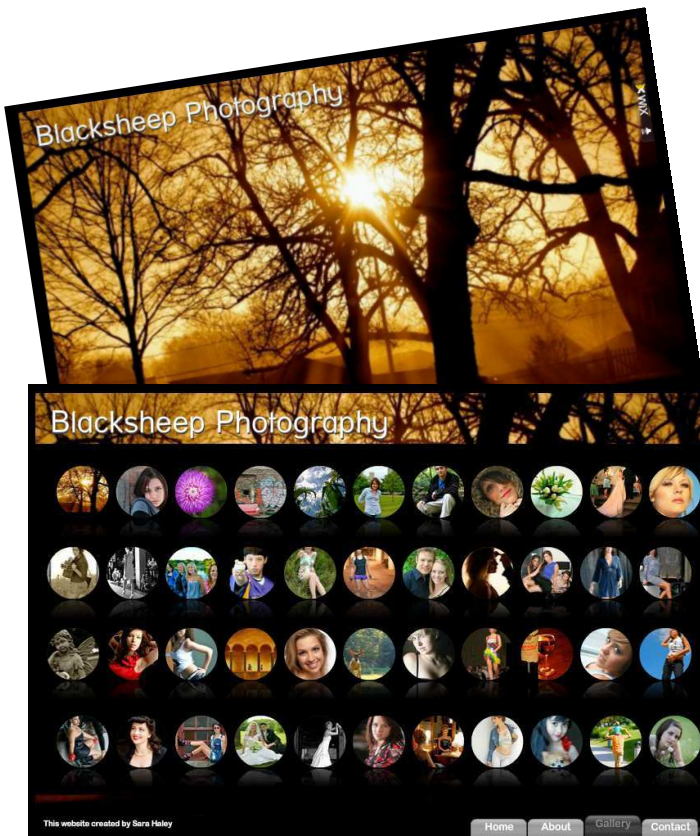

While I have done straight HTML websites in the past, I have found that Flash has become the gold standard in website design over time. I have worked with Wix.com and discovered that it works great for numerous kinds of business websites. I have designed my own site with it, as well as other company sites, and have experienced great results. I am able to compile Wix websites for clients who are looking for a great way to showcase their products and services to others on the web with an eye-catching Flash site.

Please note: Since creation, website owners may have made their own changes to the site that were not initially done by me. Future edits may not reflect the work I had already completed on the site.

SaraKHaley.com

This is my own website that was created with the Wix interface. Photography and content by Sara Haley.

Blacksheep Photography
sjlambo1.wix.com/
blacksheepphotography

The owner of Blacksheep Photography of Omaha approached me to create a website to display his past photography. On this site, I created an easy-to-browse interface, as well as a clever at-a-glance portfolio of his favorite images from his career.

The Playful Pup
playfulpupsomd.com

The Playful Pup doggy daycare website was created to be both fun and functional. For this client, I also designed their logo, as well as their entire website. Most of the content was provided, and many stock photos of dogs and puppies were used to complete the clean look the client requested. The entire site ties together with white, red, and black, and has a fresh and fun feel throughout.

Bellevue Fine Arts Center

bellevuefineartscenter.com

This local client requested a simple website with information for his dance studio. He wanted a site that reflected class and elegance while being modern and clean. The design is done to be easy to read, simple to navigate, and beautiful. Colors of black and maroon were used to create this design and integrate photos, videos, and information for new and existing students of the studio.

eBook Design

As a previous desktop publisher before entering the freelance world, I took great pride in creating digital masterpieces with a software program, some stock images, and my imagination. Several clients have hired me to complete eBooks, and I have completed a few of my very own as well, from content to finished creation.

Please note: Quotes for eBook design can be very difficult, considering there are many variables included in the creation of one. The number of pages, extent of the layout, purchase of stock images, and written content need to be taken into consideration when quoting an eBook project.

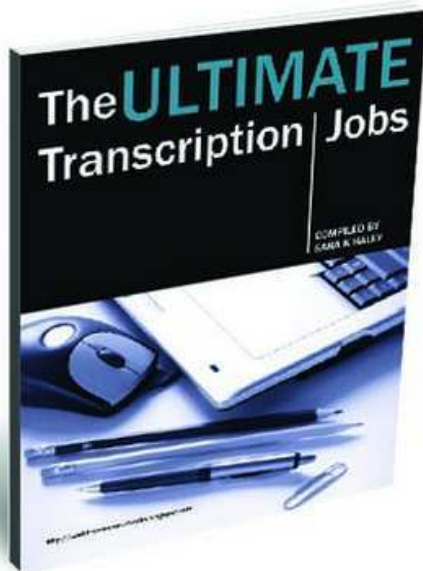

National Brotherhood of Fathers' Rights

A series of 12 eBooks was created from previously written content. The books were laid out and designed from front to back, including matching covers to complete a full set of eBooks with a consistent design and appearance.

Albert Mensah

Public speaker, Albert Mensah, contracted me to create a series of eBooks on leadership, success, and online marketing. They were all created with a consistent look throughout.

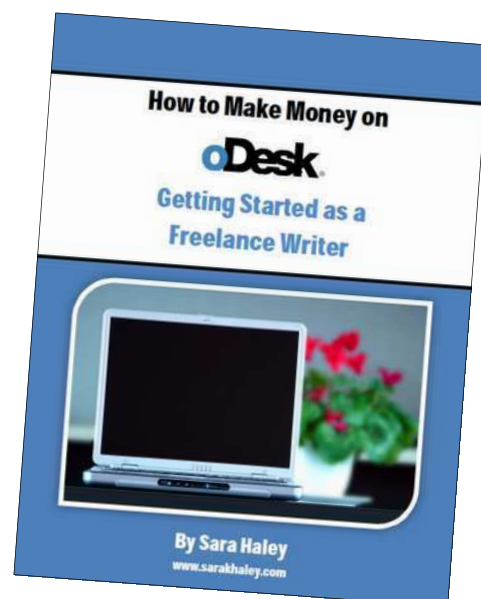

The Ultimate Transcription Jobs

As a transcriptionist, I compiled a list of over 450 actively hiring transcription companies, checked with the BBB and sorted in this eBook for easy searching.

How to Make Money on oDesk

I created a series of eBooks to help individuals get started on the oDesk freelancing site. It was recognized by the company and led to an invitation to write a contributing blog post for the oDesk community.

Digital Audio Transcription

Digital audio transcriptions are done in order to provide written content from an audio file. Interviews, market research groups, and podcasts are all common examples of files that can benefit from transcription. Many audio files are transcribed in order to provide content that can be placed on a company's website to help with search engine optimization.

Contact Sara Haley with a sample clip of your audio in order to receive an accurate quote for your digital audio transcription.

I was hired by Albert to transcribe several of his speeches to utilize in eBooks and on his blog for SEO content. I have transcribed both video and audio content for Mr. Mensah in the past.

Hyperion Herbs

Internet Blog Creation

In order to be on top of your game when it comes to content creation, having a company blog is key. Many large corporations use blogs to provide informative tips and tricks for their customers, as well as create a sense of expertise and knowledge to increase customer comfort when working with your company. Blogs also help with Google site rankings, so creating and maintaining a blog is important. I have created and maintained several blogs for clients over the years.

I have been commissioned to take photos upon request by clients, and have a huge selection of photos that I have taken on my own. If your company has a photo concept in mind, I can be contacted for images.

Ghostwriting

Ghostwriting is when a contractor creates content without a by-line—and it is written under another company or person's name. I have provided ghostwriting services for many contracting companies, and here are just a few I worked on in the past.

Dennis Gac—Women for Fathers' Rights
www.womenforfathersrights.blogspot.com

Omaha Farmer's Market Review: Wholesome Foods, Healthy Snacking, Family Fun

Submitted by Guest Writer on Fri, 09/23/2011 - 06:00

A recent business trip landed me right in the heart of Omaha, Nebraska. My hotel was right in downtown Omaha, a hop, skip, and a jump away from the Saturday morning farmer's market. The lady at the hotel's front desk recommended it as a local event to check out, so I made sure I penciled it into my itinerary.

While a majority of the city of Omaha was sleeping in and catching up on lost sleep, I got myself dressed and ready and headed down a few blocks to the downtown Omaha's Farmer's Market, which proved to be loaded with wholesome foods and a haven for family fun.

Conversely, Sara got back to me right away. She reviewed the project and said that it was as I thought, but honestly told me that there was one aspect of the job with which she had no experience. She said she would educate herself at no cost to me. Ultimately, she finished the job in less than an hour, and kept me informed as she did it. I highly recommend her services. I've worked with a number of designers throughout my career, and she rates at the top due to her professionalism, honesty, and follow-through. I'll definitely be using her again!"
