

w/o chin strap

flap can be used apart

pocket for cool pack

Bump caps protect workers from minor impacts in environments that do not require hard hats or helmets. ABS shell inserts are extra strong, lightweight that resist chemicals, moisture, and moderate impact. They typically have perforated vents that keep workers cool and Velcro straps that adjust the bump cap's fit. Bump caps can also resemble baseball caps. The plastic shell is hidden inside pure cotton outer layer. These bump caps have a low-profile design and are breathable.

- Outer fabric baseball cap, ABS shell insert with foam padding in the low-risk workplace
- Lightweight working caps are great for full time outdoor workers
- Air holes on both sides of cap for better ventilation
- Size Ranges: one size fits all
- Standard: According to  $\text{CE}$  EN812

Customized products including logo by printing, embroidery on fabric, or/and buckle-embossed with logo are available as per individual request!  
Do not use where ANSI or CSA or EN397 head protection is required.
