QuickProfile OxiStress™

LumiQuick Quick Profile OxiStress™ is designed to provide a quick and convenient tool for the measurement of oxidative stress in humans and animals, through the measurement of markers such as protein, enzyme, lipid & DNA.

To provide reference information on human health status.

Improve livestock's productivity and product quality.

Study of oxidative mechanism in bio-specimens to provide the clue for curing the diseases caused by oxidative stress.

Diseases Often Associated to Oxidative Stress:

ADHD, Cancer, Parkinson's disease, Lafora disease, Alzheimer's disease, Atherosclerosis, Heart Failure, Myocardial Infarction, Fragile X Syndrome, Sickle-cell Disease, Lichen planus, Vitiligo, Autism, Infection, Chronic fatigue syndrome and Depression.

Quick Profile™ OxiStress Tests:

Oxidative stress reflects an imbalance between the systemic manifestation of reactive oxygen species and a biological system's ability to readily detoxify the reactive intermediates or to repair the resulting damage.
