## INFECTION CONTROL

**Ensure Safety for Self and Others** 

Dial Triple Zero (000) for an Ambulance

#### IN GENERAL

Wash your hands regularly, before eating, before food preparation, after toilet use

Immunisation - many diseases are preventable Practice hygienic food handling and preparation techniques Avoid sharing food, drinks, and personal items

Wipe away blood and spills
Clean and disinfect
Safely dispose of left over food
and other waste

Avoid transmitting infections and contact with body fluids

### These methods are STANDARD PRECAUTIONS

Which are safe practices to be applied for all first aid, regardless of a casualty's infectious status.

# HOW TO MINIMISE THE RISK OF EXPOSURE AND CONTAMINATION

#### **HAZARD = EXPOSURE**

Airborne - sneezing and coughing Direct contact - body fluids or contaminated items.

#### **RISK = CONTAMINATION**

Being infected by a disease. Passing on a disease.

#### **FOR FIRST AID**

Wash hands with soap and water or apply an alcohol-based hand rub.

Use and wear Personal
Protective Equipment (PPE):
i.e. disposable gloves for all first
aid; masks for CPR; eye
protection and plastic aprons to
protect from splashing.

Remove PPE carefully.

Dispose of PPE, used dressings, bandages and infectious waste in an appropriate bin or container.

Wash your hands thoroughly with soap and water.

**WASH HANDS** 

## WASH HANDS

Reduce exposure.

Wash your hands.

Use hand rub gel.

Use gloves.

Use CPR mask

Safe disposal.
