

If you have an Amazon Fire TV Stick and want to watch IPTV on it, you'll need to install the RockBuster or USA + POLAR Player app.

Step 1: Enable Apps from Unknown Sources

Before you can install any third-party applications, you need to enable "Apps from Unknown Sources" on your Fire TV Stick. Here's how to do it:

1. From the Fire TV Stick home screen, navigate to "Settings" at the top of the screen.
2. Scroll to the right and select "My Fire TV."
3. Select "Developer Options."
4. Turn on "Apps from Unknown Sources."

Can't you find the "Developer Options" in the Settings menu?

To enable developer options on your Amazon Fire TV, open the Settings Menu, and navigate to My Fire TV > About. Select your device's name 7 times, until you see "No Need, You Are Already a Developer." The Developer Options menu will then be accessible in your Settings.

Once you've enabled Apps from Unknown Sources, you can Install RockBuster / USA + POLAR Player app on your Fire TV Stick.

Step 2: Install RockBuster / USA + POLAR Player

1. From the Fire TV Stick home screen, navigate to the search bar in the top-left corner.
2. Type "Downloader" and select it from the search results.
3. Select "Get" to download and install the Downloader app.
4. Open the Downloader app.
5. In the URL field, enter the DOWNLOADER code: **61694**.
6. Select "Go" to download the app APK file.
7. You will be redirected to our APP STORE. You can select the APP as required in your membership details email.
