Jefferson County Pct. 1 Road & Bridge is here to help you when installing a new culvert or replacing an old one. We will inform you of the correct size and type needed.

**Material List for:**

- Installing New Driveway
- Installing Add-ons to Existing Driveways

**Culvert:**

- Plastic      Size: \_\_\_\_\_      Quantity: \_\_\_\_\_
- Gravel      Amount: \_\_\_\_\_

- Must follow current Precinct and County Policies
- County will provide the labor and fill dirt needed for installation of a culvert at no cost
- The culvert must be purchased by the homeowner and onsite before installation begins.
- During construction, to protect your new culvert, we recommend that you cover your newly installed culvert with mats, heavy plywood, or something to distribute weight until material has had time to settle. This should help prevent your culverts from being damaged.
- Any relocation of a culvert will have a minimum charge of \$400.00 and is the responsibility of the homeowner.
- Concrete driveway foundation framing must be inspected by Jefferson County Pct. #1 Road & Bridge before concrete is poured over culverts.
- Should a culvert cause issues, such as flooding, at sole discretion of the county culverts could be removed, at the cost of the customer.
- Cost of maintenance of the culvert and material around culvert will be the responsibility of the customer. Customer will be responsible for maintaining driveway.

I have read and understand the procedure above.
