

# ARE YOU LOSING EASY REVENUE AND AN OPTIMIZED STAR RATING?

A therapy-centered OASIS review with TSC is the next best step to ensure optimized revenue, star rating, and prepping your agency for HHVBP.

## ABOUT TSC OASIS REVIEW

CMS OASIS guidance supports interdisciplinary collaboration that holds the key to ensure optimized scoring, outcomes, and revenue. Given that each discipline has their area of expertise, collaboration can more accurately score the OASIS items as each discipline sees the patient from a different perspective and focus. When TSC performs OASIS reviews, we utilize our therapy background in accurately researching documentation that supports appropriate scoring on the OASIS. This in turn creates improved star ratings in preparation for HHVBP.

## WHAT WE OFFER

One sample of data collected from TSC PDGM therapy-focused functional component reviews resulted in an improvement of (C) High Functional level component scores from 21% to 93%. At minimum, the average increase in revenue from (B) Medium Functional level to (C) High Functional Level is \$190 per 30 day episode. Depending on your census, this amount could provide a **significant financial gain**. Keeping in mind some of the M1800s also directly affect outcomes potential that reflect an **agency star rating** which make the importance of the accuracy three fold with HHVBP on the horizon.
