

Letter from the President of MedPure Weight Loss

Dear MedPure Member,

Semaglutide and Tirzepatide are not just amazing weight-loss medicines. They may also be near Cure-all Wonder Drugs.

As shown in the Research Section of MedPure.com, both Semaglutide and Tirzepatide have had positive results on, and continue to be researched for:

- Diabetes, pre-diabetes, & insulin-resistance.
- Heart health including heart disease & heart attacks.
- Blood clots including strokes.
- Blood-pressure & cholesterol.
- Inflammatory diseases including arthritis & liver disease.
- Oxidation & free radicals, including Alzheimer's, Parkinsons, & cancer.
- Addictive behaviors including nicotine, alcoholism, & drug abuse. Depression.
- Longevity and increased healthy lifespan.
- ... and more.

Personally, I take a Maintenance Dose of Semaglutide (.5mg, the same as our \$195 Monthly Maintenance) NOT to lose weight BUT for all these medical benefits.

Semaglutide's and Tirzepatide's mechanisms of change are vast. It seems like a new medical benefit and research study with them are being identified every day.

If you know anyone susceptible to or suffering from any of the above conditions, please forward this email and point them to the Research. You might save a life.

As with all medical conditions, I encourage you to see a Medical Specialist.

If you wish to talk about this Research, or start or re-start Semaglutide or Tirzepatide the right way, book an Initial Consult with us [HERE](#).

Thank you.

Sincerely,

Dr. Richard Strand

P.S. We use only certified Semaglutide and Tirzepatide.
