D Colors

1	Every screen showing colors different, don't try to use computer or mobile phone screen to judge color, you will be disappointed
2	If you have a specific color you want to use, take a photo and send it to us, it is NOT a good idea
3	The best way to pick a color is = pick color from our actual swatch. If you are so sensitive about color, send us a color reference, we will give a try
4	The 2nd best way to pick a color is = give us pantone number = CMYK value always better than RGB value
6	If you need fabric color swatch from us, please contact us, we will send it to you. Swatch free of charge, but you will need to pay for shipping charge
7	We cannot print metal colors, such as Gold or Silver, but we can try to use Yellow or Grey to achieve metal color, but for sure it is not true metal color
8	Same color CMYK or RGB value, print on different fabric, may look color shade different, that is because the fabric refracts color differently
