MICRO, MINIATURE AND SMALL ORCHIDS

## ANGRAECUM DIDIERI

**Origin:** Madagascar

**Temperatures:** Hot to cool growing small orchid species

**Light:** Bright shade

**Watering & Fertilizing:** Regular watering and fertilizing year-round, let slightly dry between watering

**General care:** Easy to grow orchid, excellent starter plant for any newbie orchid grower. Best grown mounted or potted, in bright shade, letting slightly dry out between each watering. Do not use too much moss when mounting and use light well drain mix when potting, best in baskets. Great plants for windowsills, vases, terrariums, greenhouses or outside in Florida year-round.
