

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

ANGRAECUM ELEPHANTINUM

Origin: Madagascar

Temperatures: Warm to cool growing small orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, letting slightly dry out between waterings

General care: Small size orchid with quite large blooms. Grows best potted or mounted, in bright shade, warm to cold temperatures and letting slightly dry out. Potting in wooden / plastic baskets with well drained mix. Excellent for windowsills, terrariums, greenhouses or Florida outside growing.
