MICRO, MINIATURE AND SMALL ORCHIDS

## BULBOPHYLLUM MAQUILINGENSE

**Origin:** Philippines

**Temperatures:** Hot to warm growing small orchid species

**Light:** Shade

**Watering & Fertilizing:** Regular watering and fertilizing year-round, high humidity.

**General care:** Interesting small Bulbophyllum species with cute strange looking blooms. This is easy to grow orchid and great started plant for anyone who is into Bulbophyllums. Grows well potted or mounted, hot to warm, shade and never letting completely dry between waterings. Great for Florida outdoors growing, indoors – windowsills, vases, glass orbs and frog encounters or terrariums, greenhouses.
