MICRO, MINIATURE AND SMALL ORCHIDS

BULBOPHYLLUM PLANIBULBE

Origin: Asia

Temperatures: Hot to intermediate growing miniature size orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and fertilizing year-round with high constant humidity, never bone dry

General care: Still rare in collections, this miniature Bulbophyllum species has absolutely stunning blooms! Creeping growing habit is cool too. Grows best under hot to intermediate temperatures, in bright shade, with high humidity, moist. Due to creeping growing habit it is better mounted but can be grown potted in mesh baskets with moss too. Great for windowsills or greenhouses, terrarium, vivarium, vases and glass orbs and outside in proper zones.
