MICRO, MINIATURE AND SMALL ORCHIDS

## CENTROGLOSSA MACROCERAS

**Origin:** Brazil

**Temperatures:** Warm to cool growing miniature size orchid species

**Light:** Bright shade

**Watering & Fertilizing:** Regular watering and fertilizing year-round, letting slightly dry out between waterings.

**General care:** One of commonly overlooked mini - miniature orchids that follows many Brazilian species with large blooms (in compare to leave size) and white/green color combo. It's quite easy to grow and bloom. Grows best under warm to cool conditions, in bright shade, with air movement, high humidity but letting slightly dry out between waterings. Great for any terrariums / vivariums, frog encounters and glass orbs, windowsill growing, greenhouses and outside in proper zones.
