MICRO, MINIATURE AND SMALL ORCHIDS

## DENDROBIUM BRASSII

**Origin:** Papua New Guinea

**Temperatures:** Cold to intermediate growing small orchid species

**Light:** Bright light

**Watering & Fertilizing:** Regular watering and fertilizing in active growing season, this orchid will go semi-deciduous, oldest canes will shed leaves, there may be some new growths actively growing during the winter time - stop fertilizing in October and lower watering for winter months.

**General care:** Clusters of long-lasting pink blooms on this cute PNG Dendrobium species. We particularly love round pseudobulbs and thin grass-like leaves. Grows well potted or mounted, cold to intermediate, bright light. Use only good quality water, and reduce watering for winter months. Great for outdoor growing in proper zones, indoors – windowsills, vases or terrariums, greenhouses.
