MICRO, MINIATURE AND SMALL ORCHIDS

## DENDROBIUM LATERALE

**Origin:** Burma

**Temperatures:** Warm to cool growing miniature orchid species

**Light:** Bright shade

**Watering & Fertilizing:** Regular watering and fertilizing in active growing season, this orchid will go deciduous & will shed all leaves - stop fertilizing in October and stop watering for winter months when dormant with light mist to prevent pseudobulbs from shriveling (every 7-10 days).

**General care:** This is rare opportunity to add to your collection, new mini miniature Dendrobium species with stunning blooms and interesting growing habit. Blooms appear on leafless pseudobulbs late winter / spring, color of blooms can be anywhere between white, through light pink to dark pink color. Can be grown potted or mounted, bright shade in the summer, bright light in winter time. Great plants for windowsills, terrariums, vases, greenhouses or outside in proper zones.
