MICRO, MINIATURE AND SMALL ORCHIDS

DENDROBIUM BRACTEOSUM VAR. TANII

Origin: Papua New Guinea

Temperatures: Hot to intermediate growing small size orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and fertilizing in active growth, semi – dormant orchid - no fertilizing from October, reduced watering in winter months till new growths appear in the spring.

General care: Adorable Dendrobium with clusters of beautiful blooms that last literally for months! Easy to grow and bloom plants if proper culture is followed – best when grown under bright shade to bright indirect light, with good air movement and letting dry out between waterings! Can be grown potted or mounted, wooden baskets work the best. Great for outdoor / indoor growing, windowsills or greenhouses. Can be grown in Florida outside year-round.
