

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

DENDROBIUM SUBACAULE

Origin: Papua New Guinea, Solomon Islands, Moluccas

Temperatures: Cold to intermediate growing mini – miniature size orchid species

Light: Bright light

Watering & Fertilizing: Regular watering and fertilizing year-round, only good quality water, high humidity.

General care: This can be considered as “delicacy” and definitely one of the most sought-after miniature Dendrobium species. It is also one of our favorite! Super tiny plants produce beautiful reddish blooms. These plants are sibling cross between orange variation and red variation, and some leaves maybe variegated. Grows best under intermediate to cold conditions, in bright light, good air movement, high humidity but letting dry out between waterings. Can be grown potted or mounted. Great plant for terrariums, vivariums, indoor growing on windowsills or greenhouses and outdoors in proper zones year-round.
