

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

LEPANTHES HELICOCEPHALA

Origin: South America

Temperatures: Hot to intermediate growing miniature size orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, high humidity, good quality water

General care: One of hot growing Lepanthes with amazing blooms, blooms constantly throughout the year. Grows best under hot to intermediate conditions, in shade, high humidity, never letting completely dry out, using only good quality water. Great plant for terrariums, vivariums, glass orbs, frog encounters. Great for indoor growing or greenhouses, windowsills or outside.
