

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

LEPANTHES UXORIA

Origin: Ecuador

Temperatures: Warm to cool growing miniature size orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and weak fertilizing year-round, high humidity, using best quality water, only rain or reverse osmosis.

General care: One of highly sought for Lepanthes species, tolerates warmer temperatures with amazing and large blooms (for the species). Blooms appear on the bottom of round shaped leaves. Spikes are sequential bloomers and re bloom constantly throughout the year. Grows best under cool to warm conditions, in bright shade, with high humidity and good quality water only. It should never be bone dry but also not constantly soaking wet. Can be grown potted or mounted. Great for any terrariums / vivariums, frog encounters and glass orbs, greenhouse growing.
