

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

LEPANTHES CALODICTYON

Origin: Colombia & Ecuador

Temperatures: Warm to cool growing miniature size orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, high humidity, only good quality water.

General care: There are several Lepanthes species with stunning marbled leaves, and this one is in the group – it is super attractive even when not in spike. As many other Lepanthes, this one is sequential bloomer, spikes will re-bloom for months. It does grow well under intermediate to warm conditions and high humidity with bright shade. Can be grown potted or mounted. Excellent for any terrarium, vivarium, glass orb, frog encounter, greenhouse growing.
