

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

LEPANTHES NEPHRIDIA

Origin: Ecuador

Temperatures: Intermediate to cold growing miniature size orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and fertilizing year-round, high humidity and good quality water.

General care: Very rare in cultivation, there is no information on growing habit, this undescribed Lepanthes species from Ecuador produces stunning blooms throughout the year. Grows best cool to intermediate, potted or mounted, in shade, good air movement, moist, never letting bone dry, high humidity, good quality water and weak fertilizing. Great for terrariums, vivariums, frog encounters, glass orbs, windowsills or greenhouses.
