

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

LEPANTHOPSIS ACUMINATA

Origin: South America

Temperatures: Hot to cool growing miniature size orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, good quality water

General care: Very cute miniature Lepanthopsis species with quite interesting long spikes carrying dozens of translucent blooms that are beautifully shaped! Can be grown under cool to hot conditions, either potted or mounted, high humidity, bright shade, good quality water. Great for outdoor / indoor growing, windowsills or greenhouses. Perfect for any glass orb, vases, frog encounters, terrariums / vivariums.
