

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

LUDISIA DISCOLOR "GREEN"

Origin: Asia

Temperatures: Hot to intermediate growing small size terrestrial / jewel orchid species

Light: Shade / bright shade

Watering & fertilizing: Regular watering and fertilizing year-round with high constant humidity, never bone dry but not soggy wet

General care: Jewel orchids are not grown so much for their blooms, but for their amazing leaves that are decorative focal point of any terrarium or frog encounter. This Ludisia has very nice heavily veined greenish leaves! Grows best under hot to intermediate conditions, in shade / bright shade, high humidity. Should be grown potted either in moss or terrestrial orchid mix like peat moss and perlite. Great plant for terrariums, vivariums, vases, frog encounters, indoor growing on windowsills or greenhouses and outdoors in proper zones.
