MICRO, MINIATURE AND SMALL ORCHIDS

## MALAXIS CALOPHYLLA

**Origin:** Asia

**Temperatures:** Hot to cold growing small size terrestrial / jewel orchid species

**Light:** Shade

**Watering & fertilizing:** Regular watering and fertilizing in active growing season (spring summer), semi-deciduous – no fertilizing in the winter time, low watering during dormancy when leafless till new growth appears.

**General care:** Jewel orchids are in high demand and they are usually grown not as much for their blooms as they are for their beautiful leaves! Malaxis species are one of highly sought-after plants. Gorgeous leaves are great decoration for any terrarium, vivarium, vase. Perfect orchid for any frog encounters! Grows best in shade, high humidity, moist. Always trim old spikes, old leaves will die off and new growths will sprout from old healthy bulbs. Perfect for indoor growing, greenhouses and outside in proper zones.
