MICRO, MINIATURE AND SMALL ORCHIDS

## MEIRACYLLIUM TRINASUTUM

**Origin:** Central America

**Temperatures:** Hot to cold growing small size orchid species

**Light:** Bright shade

**Watering & Fertilizing:** Regular watering and fertilizing year-round, letting dry out between waterings

**General care:** Small size orchid species, easy to grow - this is rare 'alba' white color form. Gorgeous blooms appear in spring / summer and they produce cinnamon/clove scent. Grows best under hot to cold conditions, in bright shade, good air movement, letting dry out between waterings. Can be grown potted or mounted but due to creeping growing habit it's better grow mounted, or potted in wooden baskets. Great plant for terrariums, vivariums, vases, indoor growing on windowsills or greenhouses and outdoors year-round.
