

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

RESTREPIA CONTORTA

Origin: South America

Temperatures: Cold to warm growing small size orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and fertilizing year-round, high humidity.

General care: Beautiful Restrepia species, and in my opinion one of the nicest blooms in the family. Grows best under warm to intermediate conditions but can be grown cold too, in bright shade, good air movement, high humidity and never bone dry. Great plant for terrariums, vivariums. Great for indoor growing on windowsills or greenhouses.
