

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

TELIPOGON ASTROGLOSSUS

Origin: Peru

Temperatures: Warm to cold growing miniature size orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and fertilizing year-round, good quality water only, high humidity.

General care: We can't get more excited about any orchid! This amazing miniature size Telipogon is not only super cute, but it is warm tolerant Telipogon!!! Grows best under cold to warm conditions, in bright shade, good air movement and high humidity but never soggy wet. Only good quality water. Can be grown potted or mounted, when potting or mounting, do not put too much moss and mount it loosely. Great plant for terrariums, vivariums, glass orbs, vases, indoor growing on windowsills or greenhouses and outdoors.
