FUNG SHUI EXAMPLE TO SHOW MOUNTAIN & FACING STARS IN CYCLE 7 (1984 - 2004)

The left top corner number is for mountain, which is something higher than your house. We don't use it, unless there is something taller than your home in that direction, such as mountain or high rise building etc. The right top corner number is for facing, which we should use it to check good and bad for your house. The middle number is the flying star for 7 Cycle. We are also not using it. The '03' is the year 2003 flying star & '04' is the year 2004 flying star.

Let say the 8 directions are North, NE, East, SE, South, SW, West & NW. If we divide each direction into 3 directions, 1, 2 & 3, this house is sitting at at South 3. This is a very good direction in 8 Cycle, if you move in within 2004 to 2023. But you have moved in the house in 7 Cycle, that is before 2/4/2004. This means that the Feng Shui of this house is not very good to make money. The house's 5 element is 3, which is belong to wood. The year you born is 2, which is belong to earth. As wood destruct earth, which is not good for you. In this situation, it need to use fire, (lights always on) to solve the problem. The wood will produce fire, and the fire will produce earth. In this situation, fire is harmonious between wood and earth.

In Cycle 8, the 8, 9, 1 are good stars, the 3 & 6 stars can be used, and the others stars are bad.
