

Mosquito Byte

MAY 2000

VOLUME 13 #10

NEED FOR A CHANGE

As you know, the *Byte* is published by the Mosquito Volunteer Fire Department. After making a survey of the cost to publish the *Byte* this last year, we found the subscription price does not quite meet the publication cost. So, as of this month, the subscription cost will be \$9.00.

GIVE THE CHIEF A BREAK

Devery Minor

The Chief is on vacation. Three weeks out of the year Leo is entitled to take a vacation. Two days a week he is allowed to have days off. Leo puts in 40 hours a week, not including board meetings and training. Except for legal holidays and an occasional sick day, that leaves about 233 that he is available as the Fire Chief. It never fails, when Leo is not here someone always calls looking for him. I am very good at taking messages, and sometimes I even know the answer to the questions. The question most asked when I patiently explain that he is on his day off, or on vacation is, "Well do you know where he is?" I'm thinking to myself "Now how would I know; it's his day off to do with as he pleases." And then I usually answer, "No I'm sorry I don't know, can I help you or take a message?" Then they say "No, I'll try to call him at home." I have learned to say "I'm sorry he is unavailable right now." If you need Leo for something, he is available at the station between 8:00 and 5:00. If you have an emergency, see a fire or a car accident please call 911. These situations usually require more than one person to work effectively anyhow. When you call the Chief first, precious moments are lost getting the right people and equipment to the scene. If you do not have an emergency and Leo is not at the station, please show Leo some courtesy and call again later. I have known Leo for a good many years, and have found him to be a nice guy who can't say no. He has an equally wonderful family, his wife Chris and his son Nathaniel. When we disturb Leo's "away" time we also affect his family and their "quality time" together. It is easy to forget that the Fire Chief is also a husband and a father. One phone call may not be a big deal, but when

everyone does it, it gets to be a big deal. Let's learn to give the Chief a little more space and the opportunity to have of a life.

IN MEMORY OF ROLAND SMITH

As many of you know, Roland Smith passed away just as the April issue of the *Byte* was put in the mail. Roland was a special person and meant a lot to the Mosquito community and especially to the Mosquito Volunteer Fire Department. He served on both the Volunteer Board and the Mosquito Fire Protection District Board. He was also an active member of the Support Group and had trained as an EMT and was an asset on medical calls. We especially valued his expertise at his summer job, as the U.S. Forest Service lookout at Slate Mountain. Somehow, we always felt a little bit more comfortable when Roland was on duty. He knew the district so well he could identify the location of a "smoke" with great precision and saved our fire department valuable response time.

He will be missed.

MVFD BOARD NEWS

Debbie Minor

Time moves so fast these days. It seems that when we feel we have come to a lull in our lives things begin again.

There has been some new things developing or should I say some old things renewing themselves. First off, the Easter Egg Hunt on April 22 will hopefully turn out to be a dry day for us. As you will more than likely get this after it has happened I hope that everyone had a good time. I am sure that will be the case.

In May we typically have had our Spring Spaghetti feed but this year we are going to try something a little different. On May 6th, we will be having our first spring Totally Tacos feed. We plan on having the same setup as you are accustomed to with the spaghetti feed only we will be dishing up Taco's and fixin's. It will begin at 4:00 p.m. and end at around 7:30 p.m. We will also have a prize drawing. We hope you can all attend this

PUBLISHED MONTHLY BY
THE MOSQUITO VOLUNTEER FIRE DEPARTMENT

function as it should prove to be a fiesta.

Other happenings, we have received some preliminary drawings for the dam at Finnon Lake and are in the process of getting these ready to submit to the Division of Dam Safety. We are also speaking with a company who is putting in a bid on the road crossing we need done for Finnon's waterline. We will be needing some help in the near future with this project so give me a call if you can help.

As to everything else we are just going with the flow and would like everyone to think about preparing for the hot fire season to come.

PET SKUNKED???

Behold a magic cure by Gina Spadafori Davis based Veterinary Information Network:

- 1 quart of 3% hydrogen peroxide
- ¼ cup baking soda

1 teaspoon liquid soap such as Ivory

Mix and apply to stinky pet. Rinse with tap water

The merging of the hydrogen peroxide and baking soda creates oxygen in a hurry. This reaction is key to how the solution works, but its also fierce enough to **explode in a closed container**. So be cautious!

FINNON LAKE UPDATE

Diane Brady

You have probably been wondering over the past months, "What in the world is happening at Finnon Lake?" It doesn't appear that anything has changed there, and you haven't received any recent news from the Mosquito Byte, so it's high time for an update, I'd say.

Unfortunately, the reason you haven't had any news of Finnon lately is that there's not much to tell. Yes, there is still a lot of work going on behind the scenes, but it hasn't translated into visible progress, which has been a source of frustration to all of us. The main projects we are working on right now are: rehabilitation and reopening of the restaurant, complete installation of the water line, and the eventual repair of the dam.

First, the restaurant: we have been stuck in the same position for quite some time now, and that is that we can not begin the remodeling of the building until we have a building permit. And we can not get a building permit until we have acceptable plans drawn up by an architect or engineer. We have been working on this for more than a year; first with a person who agreed to help us at low cost, who ended up wasting a whole lot of time and coming up with something unacceptable to the county. Then we were fortunate enough to have Vic Garcia donate some time to work on the half-completed plans, but he can't do everything that needs to be done. Thanks, Vic, we really appreciate your assistance! But now we are still at the same juncture of needing

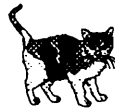

a qualified architect/engineer to prepare our plans in a form that is acceptable to the county. Please help us find someone! If you know of anyone who can do this job, WE WILL PAY!! We just need to get it moving. If you know of anyone who may be able to help us, please call me at 622-7019, or call Leo at the fire station at 626-9017.

Secondly, we are about ready to finish the installation of the waterline to the Finnon property. This will involve crossing Rock Creek Road at one point, which requires a lot of additional engineering, permits, etc. Now that we have tentatively found a contractor who is both willing and qualified to do the work, we may need volunteers to help with the job. We could use people with skills ranging from directing traffic to hoisting a shovel. If you may be able to spare a day or even a few hours to help with this, please call Debbie Minor at 621-3533.

Lastly, the dam repair plans are also progressing. We have commitments from an organization which will do the work, but we need to have the plans finalized and approved, and then find the money! We're sorry to say that the lake will not be filled up again this summer, but if we can start the work fairly soon, maybe we can salvage part of next summer.

That's all for now. If you have any questions or comments, or want to help out, please call me at 622-7019. Keep thinking positive thoughts! Thanks.

VET CLINIC

Dr. Lisa Couper, mobile veterinarian, will be at the Mosquito Fire Station on Sunday, May 14th from 9:00 a.m. until noon for walk-ins. She will make house calls in the afternoon. Call 677-4558 and leave a message to make an appointment for the afternoon or if you have a special request

HILL HAPPENINGS

Jo Thomas

Seems like our spring showers made some of you decide it was time to get outa' here. Last year, the "in" destination apparently was the South Pacific and Tahiti. Already this year it looks like it's the land down under-Australia. The *Chapmans, Peter-Corinne-Jessie & Ali*, were in Peter's home stomping grounds for a few weeks. Peter hadn't been home for 8 years and this was the girls first visit so they met many relatives (and squeezed in homework, too). The Olympics will be in Sydney this year and Jessie & Ali got to test out the Olympic pool. Now mind you this was 14 hours in the air and with Corinne's bad back, she made sure she remembered neither the takeoff nor the landing; so Peter entertained the girls the whole flight which included a visit to the cockpit of the 747.

They had perfect weather until it rained the day they headed home. (This was to re-acclimate them for here) But arriving home meant more catching up on homework for the girls plus preparing a presentation about their trip for school. By the way, Jessie will celebrate her 9th birthday this month, while her horse, Blue, will turn 5 the SAME day!

While the Chapmans were coming home **Lance & Mary Ann Haywood** were leaving, also for Sydney but with a stopover in Hawaii for several days. Lance & Mary Ann were gracious enough to share their hotel in Sydney with the Irish Prime Minister, only he got the red carpet treatment with bagpipes and all. Australia does not have pennies and \$1 and \$2 are coins. Their bills look like monopoly money so when it came to currency, Mary Ann was always asking the clerk "what color am I looking for, pink, blue?" They cruised the "haba", and every midmorning and mid-afternoon everything stopped for tea and cake. Lance had his very first scone in coddled cream. Hobart, Tasmania, which is lush and hilly, turned out to be their favorite locale and they would like to return (after they save more pennies and can get psyched up to sit that long) In Melbourne they toured the city on an electric tram while dining on a wonderful dinner that included everything from champagne to mousse cups. All too soon it was time to head home via LA, SF and Sac on what Mary Ann describes as the "14 hour flight from hell, in steerage", probably twenty some hours in all. (Corinne can give you some pointers) But both families said Australia was marvelous.

Bob & Joyce Davidson helped plan and attended their 50th high school reunion held in San Ramon. Joyce and a friend were welcoming attendees when the friend said to Joyce, "Look at all those OLD people, they can't be coming here.!!" (The DJ was booked until 1 AM, but by 10:30 everyone was tired and had left) Isn't it wonderful how our brain protects us from life's little realities. Joyce found out from a buddy of Bob's that in his elementary days Bob was known as "the wild one of the neighborhood". Now that explains everything!

Ken & Carolyn Jones, just to be different, took their first jaunt to the Grand Bahamas via Florida (on a puddlejumper with 19 seats). They actually purchased some Krispy Kremes on this trip, and researched key lime pie!

Now that skiing is on the skids, golf is coming into the fore! And we have student golfers, EXCELLENT student golfers. Both **Adam Harris** and **Brian Okumura** have medaled, and in doing so were a major reason their team set a school record for one of the lowest nine-hole scores in the area on a par-36 course. Not only that, Adam as well as **Joe Hinds** were on the El Dorado High School 1st semester

honor roll.

Since this month is graduation, we congratulate and wish all our seniors the **very best: Jessica Devlin, Jaime Donner, Joe Hinds, Brian Okumura & Trisha Penrod**. (Some are the youngest family members so looks like we will be having some empty nests) Also, after two years at Sierra Junior College, Amy Harris has been accepted at San Diego State so that's where she'll be heading in the fall to continue with her teaching credentials.

Russ Bayless has joined the ranks of those experiencing the "not if but when" you have an accident on Mosquito Road syndrome. So Russ & Connie now have a brand new Nissan pickup. And Russ had just taken his 15 year old Mitsubishi on a trip to Oregon and it didn't even use a drop of oil.

Joeann Doll told me she and Roy get many inquiries regarding **Jim & Darling George** and wanted to give everyone an update. After living on Log Cabin Lane for 20 years, Jim & Darling left our area last year. They had a modular built on the acre they purchased in Shingle Springs and are now ready to move in. And of course Jim has already planted a number of trees.

G'day mate, and roses to all the mothers in our community on the hill.

SCPOA NOTES

John Moalli

Fences

The white fences surrounding Swansboro are a beautiful part of our neighborhood. The association maintains some of the fences, while others are on private property. Our DC&R's discuss maintenance of the SCPOA fences, and indeed that is where some of your association dues go. Many of you may have noticed that we have started to replace some of our wooden fences with vinyl; Mel Joyner, Paul Hinds and a group of volunteers have been busy at work. The vinyl fences are more expensive initially, but painting and other maintenance are virtually eliminated, so greater value is seen in the long run.

Gradually, we will be replacing more and more fences, and lately we have been looking at the areas around Trout lake and by the Airport on Mosquito Road. For those of you with white fences along your own property, SCPOA may be able to save you some money if you order vinyl fence material soon - if we all purchase fence together we may be able to get a volume discount. Please contact the board if you are interested.

Board Meetings

The board meets on the third Saturday of every month at the fire house at 9AM. Each meeting has designated time slots, near the beginning and end of the Agenda, for members of the community to come

forward and address the board with items of interest or concern. Please come and interact with your board so that we can better serve you. You can always contact us at 621-0309.

CRAFT CORNER

Betty Kinney

10 ladies joined us for crafts on Thursday, April 13th. Many of our projects were finished and new ones begun. Thanks to all you ladies – and a big thanks to all of you who are working on projects at home. Hazel Smith joined us, welcome back. A reminder of a Tea being given by Darlene Rood and her Mom, Lynn Spitsen on Saturday, May 27th at 10:00 AM. She will have ideas of crafts that we will be able to make and also see her beautiful new home. I will be calling you before the date for an R.S.V.P.

Bring a friend next craft day, Thursday, May 11th, 9:00 AM at the Fire Station. I almost forgot the most important thing! The pot luck was nice, lot of salads topped off with a pie and a birthday cake for Nell Dasher. I don't need to tell you who the baker was, do I? Thanks Caroline!

If you need a ride – call me at 621-1879.

SOMETHING DIFFERENT

Evelyn Potter

This is quicker to fix than it looks and is well worth your time.

Garlic Broccoli

1 bunch broccoli (about 1½ lbs.)

6 cloves garlic

1 cup chicken broth (homemade or canned)

¼ t salt (or to taste)

¼ t pepper

Cut florets from broccoli, about 6 cups. Peel stalks and slice thinly lengthwise.

Crush garlic with knife blade, or mince. Put garlic into a large deep skillet with chicken broth, salt and pepper. Bring to a boil. Reduce heat, add broccoli. Cover and simmer 5 to 7 minutes or until broccoli is crisp-tender.

IT RAINED AGAIN!

Norm Benes

Some locales, if one doesn't like the current weather or climate, the natives will tell you to wait five minutes, it'll change. Of course, feast or famine California, the change may take 30 days or so. And location, location, location. That applies to climate as well as real estate: latitude, elevation and distance inland.

The thirty day rainless period ended on April 12. The 24 hour total measured at 8:00 AM PDT: (y'all did spring forward and didn't bite on April first?) was 0.76". Morning of the 14th, 0.72", skipped a day, then 0.11" and 0.56" on the 16th and 17th. The morning of the 18th had 0.75" and the 19th only 0.04". That brings the total to 2.94". And the season total now stands at 44.35". Adding ten percent to the Placerville season average through April (37.39"), the result is 41.13"; we're still about 3" above normal.

The balmy spring....almost summer-like....days chilled out as cool air began filtering over northern California. High temperatures that pushed into the upper seventies (even briefly peaked in the low eighties) cooled to the low seventies. Upper atmosphere high pressure nudged north toward the Gulf of Alaska. Tapping the cold Arctic air, the wind flow along the high eastern flank drove the out of season cold air south. While the Jet Stream remained well north, the abandoned cold air pool lingered off the coast. Far enough south, the southern end picked up moisture provided April's couple of inches of wet stuff. The extremely cold air aloft (minus 22°F) prompted winter storm watches and warnings for the High Sierra.

But southern California was not bypassed. Showers and thunderstorms peppered the LA area. Early Tuesday morning (the 18th) the cold air and a 103 mph southwest wind at 35 thousand feet produced the strong turbulence attested by Long Beach reporting cumulonimbus clouds; Santa Ana observing moderately developed cumulus clouds. Palm Springs reported light rain. And Arizona's Grand Canyon reported light snow at 4:00 PM Tuesday afternoon, April 18th. At that states southern end, Douglas had blowing dust from a gusty 30 mph wind. That upper

level jet over the LA basin and Arizona is one of the factors that three USAF meteorologists in 1951 showed to be responsible for producing severe thunderstorms.

It was a bit scary as a wildfire blazed near Placerville, close to Mosquito Road. The light fuels dry quickly. The recent rain may produce some fresh grasses in late summer or early autumn. Rain in May would be a factor for the production of additional amounts of light fuel. The National Weather Service furnishes daily forecasts to the El Dorado and Tahoe National Forests and to the Nevada, Placer, Yuba, Amador and El Dorado CDF units. There is an extended outlook which brings the forecast out five days.

So what does the end of April harbor weatherwise? Easter Sunday is the problem. Rain is indicated for the northern end of the state...how far south you ask? Let's go out on a limb and suggest Butte and Plumas counties briefly Saturday evening before Easter. Then the end of the month should have those pesky, gusty north winds...one-day or three day? With systems hinting at an accelerated pattern movement, one-day is a reasonable choice,

Oh come summertime! When the "living is easy." The biggest headache is how deep, how strong, how cool the marine air intrusion from the upwelling coastal California Current will be.
