Fire Department

Let's Carry on the Tradition !

Each year at this time we remember those in our community who need a little help, by preparing Christmas baskets for them. For the Baskets we will need canned foods and money donations dropped off before or the day of the Christmas Party, December 15, 2001 so we can make up the baskets and deliver them in time for Christmas.

Lots of News

Leo Chaloux

I hope all out there had a good Thanksgiving. It was a rather quiet one for those of us with the fire department. We did not have a single incident on Thanksgiving Day, which is unusual. Over the past several years it seems there is always at least one incident. We have had everything from heart attacks to kitchen fires and vehicle accidents. So we lucked out this year but we did have a medical call the next day.

Hard to believe that Thanksgiving has come and gone and Christmas is less than a month away and soon a new year will be here. Time is just going by way to fast. Not too long ago we were waiting for the failure of the world with Y2K and now soon we will be two years into a new century.

One thing we have had a lot going on lately, which is about normal for this time of the year, has been vehicle accidents. On the first real good rainstorm we had a couple of weeks ago we had to deal with four accidents. All were early in the morning, within two hours and with each they were heading into town going somewhere a little too fast. That first rain and good ole Mosquito Road will get you all the time. Especially, that part where the road first starts to drop off into the canyon. Those of us who have been around for a while call it "by the goat doctors." There is just enough of a dogleg turn in the road there where it narrows and requires slowing down and that is when the bank seems to be the braking mechanism for a vehicle going too fast. Fortunately, no one was hurt but the road was tied up for awhile and made it difficult for people to get to town and to work.

Now, that we have started getting some decent rain people are telling me how relieved I must be since the wild land fire season is over. I just tell him that only one problem has gone away for a while but the other ones still remain. More than 70% of what we do is still medical, and that never seems to go away. In fact we seem to get more medical calls in the wintertime than in the summer. This is especially true if we get a significant snowfall. People not really in good shape are outside getting firewood, shoveling snow or just dealing with the bad weather seem to have heart attacks. And then there are the vehicle accidents; they really do increase in winter. Again that is a result of weather conditions and how people drive with those conditions. Structure fires also seem to increase this time of the year as home heating appliances are used more. Another factor is people are in their homes more and that just increases the odds of something happening.

All in all I don't really know of a good time of the year when things get quiet. The possibility of something happening is always there. If it does happen to you please do not hesitate to give us a call. If there is a real emergency using 911 is the best and quickest way to get the fire fighters coming to help. Otherwise please call the fire station (626-9017) if there is not a serious emergency. Either Devery or I try to be at the station 7 days a week from. Now, in the wintertime we try to take our vacations, I usually have at an average of two meetings a week and at times we are out doing business in the district or helping someone out, but we do our best to be there.

Been getting a lot of questions regarding burn permits. Yep, burning permits are needed. Not really because of fire standards but because of air quality control. You can get one at the fire station, they are free but you do have to listen to a speech from Devery or me. Now that burn permits are tied to air quality control criteria don't be surprised when you decide that conditions are perfect for burning but when you call the number you are told it is a no burn day. We are part of the Sacramento Valley air quality control district as is Yolo, Amador, Placer and El Dorado County. So usually if it is a bad air day in Sacramento, for example no air movement (often when it is foggy in the valley we can't burn up here), too much smog from vehicles, or agricultural burning is taking place then no burning is allowed up here in the foothills. Doesn't make sense to me but that is because being a fire guy I want you to get rid of the brush and the most economical way of doing that is by burning it. The air quality control guys don't see it that way; they just care about the air today and don't think far enough ahead to realize how bad the air quality is when a 1,000 acre wild land fire is going off.

I will be teaching a Fire Fighter One class starting in January. This is a basic fire fighting class that is required of anyone who desires to be a volunteer fire fighter. It is based on the criteria established by the State Fire Marshals Office and to me is really quite fun to teach. Anyone taking the class will be taught fire behavior, how to put on fire protective gear, use breathing apparatus and many more fun things. If anyone is interested in sitting in on this class please contact me. You don't have to want to be a volunteer fire fighter. It is a fun class and will give you a good idea on what we do and why we do it. I don't care how old you are; if you are interested just let me know.

Winter is here, please check your heating appliances; make sure they are clean and properly ready to be used, check smoke detectors and carbon monoxide detectors and above all be careful out there.

*IN MEMORY OF
JOEANN DOLL*

Halloween Fun

Ron Stone

As summer eased into Fall, we found a bountiful Pumpkin harvest. The time was ripe for our annual Halloween bash. With the help of many of our thoughtful neighbors a plan was formed and preparation began. Trudy Deiglemeier made bean bags for the bean bag toss, Nancy Stone was able to borrow the Halloween props and games from Camino School, (Thanks Camino!!). The games and props brought great entertainment to the ghouls, goblins, vampires, and fairy princesses. A haunted house was set up out in front of the fire house and was so scary that I gasped as I entered the darkness.

The turn out was wonderful. The firehouse was packed and many families stayed to visit with others in our community. The atmosphere was very festive. The children enjoyed the Bat Slam and, of course, the ever popular Cake Walk which Debbie and Gina ran so well.

This event could not have been so successful without the thoughtful donations of candy, cookies, cakes, cupcakes and other goodies from the kind members of our community. Thank you so much! The volunteers who gave many hours of their time to make this event possible require a special hoorah! Ken and Mary Joseph, as usual were a bundle of energy putting out 110% to the cause. Nancy Stone did so much that "thank you" seems inadequate. Rosemary Alexander, Norm and Sandy Nester Linda Stults, Wayne and Nancy Miller, Clarence Hogrefe, Ralph Hern, Jerry Okumura, Tim Fitchner, Chris Chaloux, Dorothy Callahan, and so many others. I sure am proud to live in such a generous and thoughtful community. Thanks to Tim Fitchner and Ron Stone for chairing this event.

Parents Night Out

How would the parents like a night to shop for Christmas gifts without the kids along???? We have a solution. The board and fire dept. members will watch kids on Saturday December 8, 2001 from 3:00 pm to 10:00 pm. \$20.00 per child and maximum of \$50.00 for two or more children in a family. This will include a meal, movie, snack and crafts. Will be held at Fire Department upstairs. If interested please call for RSVP, Mary Joseph-642-0338.

Reaching Out to the Community and the Christmas Party

Nancy Miller

In addition to our Christmas Baskets for the needy families, wouldn't it be nice to adopt a stocking and fill it with special little toys for the children of needy families. Anyone interested please call Rosemary Alexander at 626-0979 or Mary Joseph at 642-0338. They will arrange for you to pick up your stocking at the fire station and bring back the filled stocking the day of the Christmas Party, December 15. This will be our first year to incorporate this along with the Christmas Baskets. We hope to have a good turn out.

Let's spruce up our Christmas tree starting this year by adding color and sentiment with each family in our community bringing a Christmas ornament to put on the tree. Each year you will see a part of yourself when you look at the decorated tree. Please drop off the ornament no later than December 14. This will give time to decorate the tree for the Christmas Party, December 15th.

Santa Claus and Mrs. Claus will be present for the children between 5:00 pm and 6:00 pm on December 15. Parents please bring a gift with your child's name on it for Santa to give them. Gifts can be dropped off at the Fire Station office. Community Christmas Party Dinner will be between 6:00 pm and 8:00 pm. Please bring your favorite dish along with your own silverware and plates. We will provide beverages and entertainment.

MVFD Notes

Mary Joseph

Hello and happy holidays. Our Volunteer Board has been very busy rolling from one event to another. We just finished up our Halloween Night. It was great to see so many people show up to help and even more people attending the festivities.

Your volunteer board held it's annual election of officers on November 1st.

We would like to welcome Belinda Brent to the board. She will be representing the community along with Rosemary Alexander Callahan. Ron Stone was

elected Vice President, replacing Tim Fitchner who finished his term and stepped down. Debbie Minor will be serving another term as President.

Our next event, The Annual MVFD Holiday Party, is approaching rapidly. Santa is polishing his boots this very minute for a special trip to the Mosquito Firehouse on December 15th at 5 pm followed by a potluck dinner at 6 pm. Mr. And Mrs. Claus will be sure to make your experience a memorable one as will our own Mosquito Children's Choir. The holiday raffle has shaped up quite nicely so far. Don't forget to bring a couple bucks and give yourself the chance to go skiing at one of many resorts in the Sierras, out to dinner with that special someone or scale the cliffs at Granite Arch Indoor Rock Climbing. There are just too many prizes to mention. Members from the community are lending their talents to make this years' party extra special.

Donations are beginning to come in for the holiday baskets. Rosemary and myself will be putting these together just in time for Christmas delivery.

Now, what about the outlook for 2002? Along with our usual events we hope to add a few. It would be nice to bring back the pancake breakfasts, chili cook-offs and other community gatherings. Bring your ideas and energy to your Volunteer Board.

We welcome everyone from the community to contact your board or attend our monthly meeting, which is held on the first Thursday of the month if you are interested in being a part of these events. You may choose to become actively involved or just share your ideas and experiences. After all, it *is* a lot of fun we'd like to work with new people all the time.

Is It Time For

A Community School?

Chris Chaloux

Mr. Freeman, our new Placerville Union School District Superintendent, is wanting community input to the need and desire for an elementary school in the Mosquito area. He is very interested in hearing our needs and concerns. I would ask you to think about safety issues due to our long and winding Rock Creek Road; proximity to the Placerville schools and their resources and the rich resources of volunteers and expertise in our own community. Also the amount of youngsters in our community is growing steadily. If you were able to come to our

Halloween Party at the Firehouse this year, you would have seen will over 100 children.

Please come to a community meeting December 10th (6:30 p.m.) at the Firehouse. The School District needs to hear our desires. Babysitting will be provided if needed. Please call 622-8611 for babysitting information or other concerns.

MOSQUITO/SWANSBORO

CRAFTERS BEGIN AGAIN

Sharon Hern

After a year off of "Crafting" it is time to get under way again to benefit our Mosquito Volunteer Fire Department. We will be having monthly craft work sessions (see date & location).

We do not know yet where and when the Annual Craft Sale will be held, except sometime in the Fall, hopefully in the Apple Hill area.

Darlene Rood has graciously offered her "Craft Room" and help for our projects. If you have any questions, ideas or craft supplies to offer, please call Sharon Hern at 626-5268.

First Craft Meeting:

Date: Friday January 18th 2002

Time: 9:30 - 11:30am

Location: 2211 Swansboro Road

Rain Showers &

Meteor Showers

Norman Benes

Anyone care whether it was dances, incantations, even supplications that brought the rain? On the last days of October, a one-two punch in the form of a weak squall line and a following cold front arched their way from the Gulf of Alaska crossing the northern third of California. Somewhat cool and bearing less than normal moisture, the up-thrusting foothills could wring-out only two-thirds of an inch of rain. The season's total through October merely 1.56". And, the average high for October...84.1° and the average low 52°.

Better in November as nearly two and a half inches of rain dropped into my gage. Of course, that is only half-way into November: with only thirty days does that make it a "short" month? And, the normal

monthly total is just a tad under five inches. And, the first half of November has been quite warm...70.5° the average high and 46.0° the average low; both 10 - 12 degrees warmer than normal. If the last half of the month is typical, cooler than normal temperatures may be expected in order to wind up with a normal temperature month.

Starting the first of November, a new wind-chill index has been issued. Developed by international meteorologists and life scientists, it is not as bone-chilling as one developed many decades ago. An example is given:

New: Wind 25 mph, air temp 20°; index is 3°.

Old: Wind 25 mph, air temp 20°; index is minus 15°.

That brings us to December. Will it be as warm as last year when the average high was 61°, or will it be as cool as December 1994 when the average high didn't quite get to 50°? The last several years high temperatures have averaged out to 53.4°; the lows have averaged out to 33.9°. Longer term averages for Sierra foothills at comparable elevations are about 55° for December highs and 35° for December lows. December precipitation while not as quirky as November, does have wild moments...such as a little over 20" in 1996 to as little as 1.59" last year. The past several years the average is 6.76". Again using longer term average for elevations comparable to ours, foothill locations check in with a 6.58" average. But, with a weak El Nino December's total might be no better than average.

Whatever happens, half a world away, Afghanistan's weather for December and January, will be cold and dry if averages rule. Kabul's (elevation 5955') lows average 27° in December and 18° in January. The highs average 47° in December, 36° in January. And, it is dry, only an inch and a half total for the two months combined. To the south, Kandahar (elevation 3462') is a bit milder. December's average high 59°, January's 56°. And, December's and January's average low is 31°. Precipitation for Kabul for both months is only 1.6". For Kandahar, the two month precipitation total is 3.9".

Too cold for me to be outside for the show Saturday night, the 17th -- 18th. I peeked outside about midnight, saw one falling star, then scurried indoors. That nearly cloud-free sky didn't keep much heat close to the ground. On Sunday morn the 18th was 39°. 40° was the low on November 1st. The last time it was cooler (colder sound better?) was a 38°

low on the 3rd of May

The National Weather Service's seasonal outlook November through January indicates that temperature and precipitation will be close to normal. That outlook is based on a weak El Nino.

Veterans Day and Thanksgiving slipped by; now it is time for Christmas. If traveling, slow and careful might be the best way.. That hint might suffice for all Yuletide shopping, as well..While the outdoor wildfire season is dormant, do remember that the cold season is here. That means heat indoors to keep our homes warm. Holiday ornaments, of all kinds, do dry out. If you do have festivities that include a house-warming, make sure that it isn't one that our fire lads-and lassies have a professional invitation.. Give them a holiday treat! And, to y'all a Merry Christmas. May 2002 be all that you desire..
