Go viral with word of mouth marketing

Your followers will show their friends this new technology

How it works for Influencer:

Complete onboarding form

1

Here you'll see all of the programs and their included exercises that are already trained with AI.

Please use this page for selection of the programs as a whole. If you'd like to use one, please use the checkmark box in Column B.

If you would like to create your own custom programs using our trained exercises, please see Tab #2, "Build Your Own Programs/Exercises". Please use the list of exercise/stretching from Tab 3, "List of all Exercises/Stretching", to fill in any exercises in your "Build-Your-Own" programs on Tab 2.

All exercises can be found by searching in the KinesteX app by the name of the Program - you will find an example of each exercise there.

AI-Trained Programs (w/ included exercises)	
<input type="checkbox"/>	Fitness Life Squats Jumping Lunges Walk Down to Plank Down Box Jump Twist
<input type="checkbox"/>	Neck Warm up Neck Twist Neck Bow Pistol Stretch Bent Sprawl Shoulder Wheel Neck Pack

KinesteX Onboarding Instructions

This form will provide all instructions for onboarding with KinesteX as well as needed from you.

Clicking the links in the form will open a new tab - please make sure you advance "Submit" so we know you've completed all the steps.

1. Fill out the link in "Step 1" of this form to select from our pre-curated exercises using our list of AI-trained exercises.
2. Upload some photos, a bio, and each exercise you choose for your program linked in the google Drive folder in "Step 2" of this form.
3. Once complete, please submit the form and we will start collating every link ASAP! (Note, this will take a week for the business to complete.)

Our Technology

- **Human pose estimation analysis approach** includes prior knowledge about human anatomy
- **Lightning Fast 2D pose estimation** used to generate 3D virtual humans in real-time
- **Body Markers** at up to 30 land-marks on and around the body at precise joint rotation axes
- **Movement Description Language** allows computer to understand human movements
- **Phase Classifier** detects and divides movements into scientific phases for analytics
- **Rep Tracking** Automatic repetition counting, clocking, and progress tracking during workouts
- **Speed Calculating** the time under tension and at what velocity movements are performed
- **Anatomic Metrics** Precise computation of the relevant metrics like angles, distances, velocities
- **Range of Motion Measure** if users go all the way through the entire exercise motion
- **Mistake Detection** Optional form correction to achieve optimal execution as set with our experts
