●Frequently asked questions and answers

*Please avoid exposing the device to extreme temperatures that are too cold or too hot for a long time, which may cause permanent damage.

*Why can't I take a hot bath with my watch?

The temperature of the bathwater is relatively high, it will produce a lot of water vapor. The water vapor is in the gas phase, and its molecular radius is small, and it is easy to seep in from the gap of the smartwatch case. When the temperature drops, it re-forms into liquid water droplets, which is easy to cause The internal circuit of the smartwatch is short-circuited, which damages the circuit board of the smartwatch and damages the smartwatch.

*No power on, no charging

If you receive the smartwatch that does not turn on, it may be that a collision occurred during the transportation of the smartwatch and the battery Seiko board was protected, so plug in the charger to activate it.

If the battery is too low, or the smartwatch does not turn on after a long time without using the smartwatch, please plug in the charger and charge for more than half an hour to activate.
