

CARE CONFERENCE SCHEDULE

Both days: 8.00 a.m. Registration Start time **9:00** General Session – intro of speakers, housekeeping, etc.

SATURDAY October 14, 2017 All day, HEALTH CLINICS

BLOCK # 1 / 9:15- 11:00

IN THE CLASSROOMS:

Demonstration of Modern and Terrier Clips on poodles, Pet trims, pet topknots with Anders Rosell.

Reproductive system of the Dog and the Bitch part 1. - Myra Savant Harris RN

Physics and forces on the performance dog - agility, field trial/hunting poodles, flyball, dock diving, obedience. - Christine Scruggs VMD

Mother Nature Meets Mother Nurture: How Prenatal Care Affects Pups' Health and Temperament for Life. This introduction to the new science of epigenetics shows how the care that our dog's parents (and grandparents) received affects our dog's lifetime health and temperament. From parent's age to nutrition to stress, the lives sires and dams lead have striking impacts on their offspring. We'll discuss the questions to how to lessen these effects, if possible, data to collect, and questions to ask stud dog owners and breeders. with Gayle Watkins Ph.D.

Recipe for a Performance Prospect – Ingredients & Marinade -Jac Harbour

Genetics -101. In this session, you will learn and understand the basic terminology used in genetics and what it means in relationship to an actual dog in front of you. – Natalie Green Tessier

12:30- 1:30 p.m. CAFETERIA LUNCH GYM & OUTSIDE YARD, DEMOS, VENDORS, EDUCATIONAL BOOTHS

BLOCK #3 / 1:30- 3:30 pm 13:30-15:30

Hands-On, Modern and T- Trim, TopKnots – Anders Rosell

Reproductive system of the Dog and the Bitch part 3. - Myra Savant Harris RN

Update on de-sexing: traditional spaying and neutering versus ovary sparing spays, vasectomies, laparoscopic procedures, etc. Christine Scruggs VMD

Fit to Be Tied: Physical Fitness Affects Stud Dog and Brood Bitch Breeding Success. We all know we are supposed to keep our dog's fit but what exactly does that mean for breeding dogs and their pups. Designed in conjunction with Dr. Chris Zink, the Fit to Be Tied program prepares studs and brood bitches to breed more easily and produce healthier pups. This initial session introduces the type of exercises should be done from before breeding until the pups go home. - Gayle Watkins Ph.D.

Recipe for a Performance Prospect – Preparation & The Proof is in The Pudding - Jac Harbour

Demystifying and Using Genetic Data in your Breeding Program: What does diversity actually mean to your breed and to your breeding program? What is IR vs OI? What is an outlier why are they important to the long-term health of a breed? What is a genetic bottleneck, anyways? Find out in this session as we go deeper into the complex and subtle nature of breed preservation and improvement (basic genetics understanding or attendance at **Genetics 101 session in Block 1 is recommended**). - Natalie Green Tessier

Junior Handling clinic: Allison Foley

GYM: Grooming Competition: All other Purebreds & Asian Style
VENDORS, MICROCHIPPING, DEMOS

3:30- 3:45 p.m. (15:30-15:45) BREAK

Demo, Show Trims – Anders Rosell

Whelping and Puppy Care part 2. – Myra Savant Harris RN

Tips & Tricks for the Salon with Nancy Bryson

The More Things Change, the More They Stay the Same: Our Dogs' Stable Temperament Traits Even as young as 7 weeks, we can see temperament traits in pups that will remain with them well into adulthood, regardless of training and socialization. These traits aren't good or bad, they are more or less suitable to activities, owners and homes. Learn which traits are stable, how to identify them and which will work best for you. – Gayle Watkins Ph.D.

Outside – (big yard) Retrieving Recipes for a Performance Prospect – Add dogs to the mix- Jac Harbour

How to use a breed analysis and matching program (such as Betterbred©) in your breeding program: Q & A at end, using examples of your own dogs already in the system. Natalie Green Tessier

Anders will show A NUMBER OF slides where he speaks about structure, movement, breed details in a Poodle & with 5 different breed standards in mind...! He also does easy comparisons to other breeds as an eye opener. – Anders Rosell & Allison Foley

Whelping and Puppy Care Q & A (if required) – Myra Savant Harris RN

Matching Pups to Homes with Avidog's Puppy Evaluation Test (APET) & Jac Harbour Puppy Evaluation.

Dogs whose temperament suits their home, are more successful in their owner's chosen activities, bring more joy to their families, and experience less stress, which contributes to their health and longevity. But how do you know what temperament traits you want in your dog? We'll cover the many activities we do with our dogs and investigate how to find pups with those traits using the APET & Jac Harbour's own testing protocols. **Gayle Watkins Ph.D. & Jac Harbour together!**
