

EVERLASTING BEAUTY™

Radermachera Hybrid

PLANT DETAILS

Radermachera Everlasting Beauty is a stunning shrub that has glossy, deep green emerald foliage and produces clusters of trumpet shaped pale pink flowers that are sweetly scented. Flowering occurs during warmer months and flowering can occur multiple times in a season. It has a strong upright growth habit ideal for hedging and border plantings. It is an extremely hardy shrub that does not require constant maintenance. It is one of the most popular plants the industry has seen in many years and you won't be disappointed in growing this beauty!

GROWING REQUIREMENTS

Radermachera Everlasting Beauty will grow in a diverse range of environmental conditions; including hot, humid tropics in the north to cool temperate areas in southern states.

Everlasting Beauty has a low watering requirement once established. It will benefit from a yearly application of slow release fertiliser applied in Spring.

Pruning is not necessary but can be done to maintain a more compact form.

USES

Radermachera Everlasting Beauty can be used in a variety of ways including, as a specimen / display tree, hedging, or *en masse* as a landscape plant.
