Iris Anywhere

Content Delivery Assurance

The industry-leading native format media player and quality control solution is what you need to ensure that your show is ready for distribution.

Use the QC tool the networks, studios and streaming services rely on.

Just some of the features:

- ✓ Technical Asset Metadata Display
- ✓ Real-Time Playback Status Panel Display
- ✓ Pre-Processed Subtitle | Caption Viewer
- ✓ Vectorscope
- ✓ Spectrascope
- ✓ Waveform Monitor
- ✓ Audio Level Meter
- ✓ Audio Router Panel
- ✓ Audio Mixer
- ✓ Loudness Monitor (CALM Act)
- ✓ Composition Playlist (CPL) Support for DCP | IMF
- ✓ Uncompressed Frame Sequence Playback
- ✓ Project Management and Collaboration Capabilities

Access any file from anywhere, anytime

Leverage your existing investment in the Cloud without paying more. QC operators and users of the application need to work with master files in their workflows for QC, not proxies.

Seamlessly connect to, and playback content from S3 to your browser with no client-side application or downloads required.
