

NJF Estimating Price Guide

www.njfestimating.com.au

NJF Estimating fees are determined by the size (m²) and complexity of your project. The prices listed below serve as a general guide only. All pricing is based on a flat site with a conventional slab-on-ground or timber subfloor. Additional costs may apply for sloping sites, block/retaining walls, landscaping, fencing, and other site-specific requirements.

Architectural homes, triple-storey builds, and house raises will be reviewed individually, and a customised fee proposal will be provided.

Please email a copy of your plans to **nick@njfestimating.com.au** to receive a detailed fee proposal.

Kind Regards,
NJF Estimating

Terms & Conditions

Estimates prepared by NJF Estimating are based solely on the plans and information supplied at the time of request. If no finish schedule, finish details, or subcontractor rates are provided, NJF Estimating will apply reasonable assumptions using current market rates and medium– to high-range finishes.

All estimates include a standard **20% builder's margin**. Please note that individual builders may apply different margins depending on their overheads, typically ranging between **15% and 25%**.

Pricing within our estimates is based on current industry-standard rates sourced from Cordell CoreLogic, as well as local contractors and suppliers.

All pricing is subject to change and may vary depending on individual builders' rates, market fluctuations, and ongoing industry price increases.

It is the **builder's/client's responsibility** to thoroughly check and review the estimate to ensure all details, quantities, and assumptions meet their requirements.
