**Presentation Title**

Students with Pediatric Brain Injury: School-Based Support of TBI in NC Schools

### Presentation Summary (Optional)

This professional learning session provides an exploration of pediatric brain injuries and their impact within school environments. Participants will examine the distinctions between federal, state, and school-based definitions of traumatic brain injury (TBI) and how these differences influence identification and support. Additionally, the session will address the cognitive, emotional, and behavioral challenges associated with brain injuries and how they manifest in academic settings. Attendees will gain valuable insights into effective management strategies, including individualized support plans and interventions tailored to students' needs. This session is ideal for educators, advocates, and professionals seeking to deepen their understanding of brain injury management in schools and enhance their ability to support students with TBI.
