

Charging microfiber cloths with PurOne for surface cleaning & disinfection.

▶ STEP 1

Place microfiber cloths in the charging container (refer to chart).

▶ STEP 2

Fill the 32oz measuring cup with PurOne solution and pour over cloths in charging container.

▶ STEP 3

Place lid on the container, and allow 5 minutes for cloths to saturate before using. (Rotate as needed).

▶ STEP 4

Apply PurOne solution to all high-touch point surfaces allowing them to remain wet for 4 minutes. Let the product air dry.

For all microfiber applications, PurOne solution must be pre-mixed in the separate 5-gallon buddy jug prior to charging cloths.
